

1999 FL70 Freightliner Fault Codes List

1998-99 DIAGNOSTIC TROUBLE CODE (DTC) APPLICATIONS

Hex Code	Scan Tool Code	DRB Scan Tool Display
6E	P0304	Cylinder #4 misfire
70	P0420	Right rear catalyst efficiency failure
71	P0441	Incorrect purge flow
72	P1899	P/N switch stuck in park or in gear
73	P0551	Power steering switch failure
76	P0172	Right rear fuel system rich
77	P0171	Right rear fuel system lean
7E	P0138	Right rear downstream O2S shorted to voltage
80	P0125	Closed loop temperature not reached
81	P0140	Right rear downstream O2S stays at center
84	P0121	TPS voltage does not agree with MAP
85	P1390	Timing belt skipped 1 tooth or more
8A	P1294	Target idle not reached
91	P1299	Vacuum leak found (IAC fully seated)
92	P1496	5 volt supply output too low
94	P0740	Torque converter clutch no rpm drop at lockup
95	P0462	Fuel level sending unit voltage too low
96	P0463	Fuel level sending unit voltage too high
97	P0460	Fuel level unit no change over miles
98	P0703	Brake switch stuck, pressed or released
99	P1493	Ambient battery temperature sensor voltage too low
9A	P1492	Ambient battery temperature sensor voltage too high
9B	P0131	Right rear upstream O2S shorted to ground
9C	P0137	Right rear downstream O2S shorted to ground
9D	P1391	Intermittent loss of CMP or CKP
AO	P0442	Evap leak monitor; small leak detected
A1	P0455	Evap leak monitor; large leak detected
B7	P1495	Leak detection pump solenoid circuit
B8	P1494	Leak detect pump switch or mechanical fault
BA	P1398	Misfire adaptive numerator at limit
BB	P1486	Evap hose pinched
CO	P1195	Catalyst monitor slow O2 upstream

1999 fl70 freightliner fault codes list is an essential resource for truck owners and mechanics who want to maintain their vehicles in optimal condition. The Freightliner FL70, a robust medium-duty truck, is known for its durability and reliability. However, like any vehicle, it can experience faults that trigger error codes, making it crucial for operators to understand what these codes mean. This article will provide a comprehensive overview of the fault codes associated with the 1999 Freightliner FL70, including their meanings, potential causes, and troubleshooting tips.

Understanding Fault Codes

Fault codes are diagnostic trouble codes (DTCs) that help identify issues within a vehicle's engine and other systems. When a problem occurs, the truck's onboard computer detects the anomaly and logs a fault code. These codes can be read using a diagnostic scanner, providing valuable information that can help diagnose and rectify issues quickly.

Common Fault Codes in the 1999 Freightliner

FL70

The 1999 Freightliner FL70 can store a variety of fault codes related to different systems, including the engine, transmission, and brakes. Below is a list of some common fault codes you might encounter, along with their meanings.

Engine Fault Codes

1. P0101 - Mass Air Flow (MAF) Circuit Range/Performance Problem
 - Cause: A faulty MAF sensor or a dirty air filter.
 - Solution: Inspect and clean or replace the MAF sensor and air filter.
2. P0128 - Coolant Temperature Below Thermostat Regulating Temperature
 - Cause: Thermostat failure or low coolant levels.
 - Solution: Check the thermostat and coolant levels; replace if necessary.
3. P0219 - Engine Over-Speed Condition
 - Cause: Engine RPM exceeds the limit, often due to a stuck throttle.
 - Solution: Inspect and repair the throttle position sensor and linkage.
4. P0401 - Exhaust Gas Recirculation (EGR) Flow Insufficient Detected
 - Cause: Blocked EGR passages or a malfunctioning EGR valve.
 - Solution: Clean the EGR system and replace faulty components.

Transmission Fault Codes

1. P0700 - Transmission Control System Malfunction
 - Cause: General transmission issues.
 - Solution: Perform a complete transmission diagnostic check.
2. P0710 - Transmission Fluid Temperature Sensor Circuit Malfunction
 - Cause: A faulty temperature sensor or wiring issues.
 - Solution: Inspect sensor and wiring, replace as needed.
3. P0730 - Incorrect Gear Ratio
 - Cause: Transmission slipping or internal failure.
 - Solution: Check transmission fluid levels and condition; consider a rebuild if necessary.

Brake System Fault Codes

1. B1001 - Brake System Malfunction
 - Cause: Various issues including worn brake pads or low fluid.

- **Solution:** Inspect the entire braking system.

2. B1002 - Anti-lock Brake System (ABS) Malfunction

- **Cause:** ABS module failure or sensor issues.
- **Solution:** Diagnose the ABS system and replace faulty components.

Diagnostic Tools for Reading Fault Codes

To read the fault codes from a 1999 Freightliner FL70, you will need the appropriate diagnostic tools. Here are some options:

- **OBD-II Scanner:** A universal tool that can read generic fault codes from most vehicles.
- **Manufacturer-Specific Diagnostic Tool:** Tools such as the Freightliner Diagnostic Link (FDL) provide detailed information tailored for Freightliner vehicles.
- **Multimeter:** Useful for testing electrical components and sensors.

Troubleshooting Common Fault Codes

When you encounter a fault code, troubleshooting is essential to pinpoint the problem. Here are some general steps to follow:

Step-by-Step Troubleshooting Process

1. **Read the Code:** Use a diagnostic scanner to retrieve the fault code.
2. **Consult the Code List:** Reference the fault codes list to understand the meaning and potential causes.
3. **Perform Visual Inspections:** Check for obvious issues such as damaged wiring, leaks, or loose connections.
4. **Test Components:** Use a multimeter or other tools to test suspected faulty components.
5. **Clear the Code:** After repairs, clear the fault code and run the vehicle to see if the issue reoccurs.

Preventive Maintenance Tips for the 1999 Freightliner FL70

To minimize the chances of encountering fault codes, regular preventive maintenance is essential. Here are some tips:

- **Regular Oil Changes:** Change the engine oil and filter at recommended intervals.
- **Inspect Fluid Levels:** Regularly check and top off all fluids, including coolant and transmission fluid.
- **Monitor Air Filters:** Keep the air filter clean to ensure optimal engine performance.
- **Brake Checks:** Regularly inspect and replace brake pads and fluid as needed.
- **Electrical System Checks:** Regularly inspect wiring and connections for signs of wear or corrosion.

Conclusion

Understanding the **1999 fl70 freightliner fault codes list** is vital for maintaining your truck's performance and reliability. Regular troubleshooting and preventive maintenance can help prevent issues from developing into more significant problems. By staying informed about the common fault codes and following the recommended maintenance practices, you'll ensure that your Freightliner FL70 remains in top shape for years to come. Always consult a professional mechanic if you are unsure about any repairs or diagnostics.

Frequently Asked Questions

What is the significance of fault codes in a 1999 FL70 Freightliner?

Fault codes help diagnose issues within the vehicle's systems, allowing for effective troubleshooting and maintenance.

How can I access the fault codes on my 1999 FL70 Freightliner?

You can access the fault codes by connecting a diagnostic scanner to the vehicle's diagnostic port, typically located under the dashboard.

What are some common fault codes for the 1999 FL70 Freightliner?

Common fault codes include SPN 5246 for the engine speed sensor and SPN 1231 for the transmission range sensor.

Where can I find a complete list of fault codes for the 1999 FL70 Freightliner?

A complete list of fault codes can usually be found in the vehicle's service manual or through manufacturer resources online.

What should I do if I receive a fault code on my 1999 FL70 Freightliner?

You should reference the fault code in the service manual to determine the specific issue and perform the necessary repairs or maintenance.

Are fault codes in the 1999 FL70 Freightliner standardized across all models?

While many fault codes are standardized, some may vary based on the engine type and specific configurations of the FL70.

Can I reset the fault codes on my 1999 FL70 Freightliner?

Yes, fault codes can be reset using a diagnostic scanner after addressing the underlying issue that caused them.

How often should I check for fault codes on my 1999 FL70 Freightliner?

It's advisable to check for fault codes regularly during routine maintenance or if you notice any performance issues.

What is the best diagnostic tool for reading fault codes on a 1999 FL70 Freightliner?

A compatible OBD-II scanner or a specialized Freightliner diagnostic tool is recommended for accurate reading of fault codes.
