

American Chemical Society Citation Format

American Chemical Society (ACS) Citation Style Examples

Articles	
Placeholder	Last Name, First Initial. Title of Article. <i>Journal Abbreviation</i> Year, Volume, Pages. <small>*Italicize <i>Journal Abbreviation</i> and Volume Number</small>
Example Online Article	Zloh, M.; Esposito, D.; Gibbons, W.A. Helical Net Plots and Lipid Favourable Surface Mapping of Transmembrane Helices of Integral Membrane Proteins: Aids to Structure Determination of Integral Membrane Proteins. <i>Internet J. Chem.</i> [Online] 2003, 6, Article 2. http://ijc.com/articles/2003v6/2 (accessed Oct 13, 2004). <small>*Indicate format in brackets [] *For online articles, include permanent URL and date accessed</small>
Example Print Article	Klingler, J. Influence of Pretreatment on Sodium Powder. <i>Chem. Mater.</i> 2005, 17, 2755-2768.
Example Material Safety Sheet Data	<i>Titanium Dioxide</i> ; MSDS No. T3627; Mallinckrodt Baker: Phillipsburg, NJ, Nov 2012, 2003. <small>*Title; MSDS Number; Manufacturing Company; Location of Company, Date.</small>

Books	
Placeholder	Last Name, First Initial. Chapter Title. <i>Book Title</i> , Edition Number; Publisher: Place of Publication, Year; Volume Number, Page.
Example Book	Le Couteur, P.; Bureson, J. <i>Napoleon's Buttons: How 17 Molecules Changes History</i> ; Jeremy P. Tarcher/Putnam: New York, 2003; pp 32-47.
Example Book with Editor(s)	Almlof, J.; Gropen, O. Relativistic Effects in Chemistry. In <i>Reviews in Computational Chemistry</i> ; Lipkowitz, K. B., Boyd, D.B.; VCH: New York, 1996; Vol. 8, pp 206-210.
Example eBook	Tour, J. M. <i>Molecular Electronics: Commercial Insights, Chemistry, Devices, Architecture and Programming</i> [Online]; World Scientific: River Edge, NJ, 2003; pp 177-180. http://legacy.netlibrary.com/ebook_info.asp?product_id=91422&piclist=19799,20141,20153 (accessed Nov 7, 2004).

American Chemical Society citation format is a standardized way of acknowledging the contributions of researchers and authors in the field of chemistry. This citation style is crucial for maintaining academic integrity, allowing readers to verify sources, and facilitating the advancement of knowledge in scientific research. By adhering to this format, chemists and researchers can communicate their findings effectively while giving proper credit to the original work that informed their studies. This article will delve into the intricacies of the American Chemical Society (ACS) citation format, providing guidance on how to properly cite various types of sources, as well as tips for creating a comprehensive bibliography.

Understanding the Basics of ACS Citation Format

The American Chemical Society citation format primarily follows two different systems: the numbered style and the author-date style. Each system has its own specific use cases, and the choice between them often depends on the guidelines provided by a particular journal or institution.

Numbered Style

In the numbered style, sources are cited using numbers in the text, corresponding to a numbered reference list at the end of the document. This method is particularly common in many scientific disciplines, including chemistry.

- In-text Citation: When referencing a work in the text, the citation is represented as a superscript number or in brackets. For example:
 - "The reaction efficiency increased significantly when temperature was raised¹."
 - "According to recent studies, the compound has shown promising results in various applications [2]."
- Reference List: The reference list at the end of the document should be numbered in the same order as they appear in the text. Each entry must contain specific details, which will be discussed in the next sections.

Author-Date Style

The author-date style is less common in ACS publications but may be used in specific contexts.

- In-text Citation: In this style, the author's last name and the year of publication are included in the text. For example:
 - "Smith (2020) reported significant findings in this area."
 - "Recent findings indicate a shift in understanding (Johnson, 2021)."
- Reference List: The corresponding reference list should be organized alphabetically by the last name of the first author.

Citing Various Types of Sources

Citing sources accurately is essential in maintaining scientific rigor. Below are guidelines for citing different types of sources using the ACS citation format.

Books

When citing a book, the following format should be used:

- Format: Author(s). Title of Book; Publisher: Place of Publication, Year; Pages.
- Example:
- Smith, J. A.; Brown, L. T. Chemistry in the Modern World; Wiley: New York, 2020; pp 45-67.

Journal Articles

Journal articles are crucial for scientific communication, and their citation format is as follows:

- Format: Author(s). Title of Article. Journal Name Year, Volume, Page Range.
- Example:
- Johnson, R. T.; Lee, K. M. Recent Advances in Catalysis. J. Am. Chem. Soc. 2021, 143, 12345-12350.

Websites and Online Sources

With the rise of digital information, citing online sources has become increasingly important.

- Format: Author(s). Title of Webpage. Website Name. URL (accessed Month Day, Year).
- Example:
- National Institutes of Health. Chemistry and Biochemistry. NIH. <https://www.nih.gov/chemistry> (accessed October 20, 2023).

Patents

Citing patents is also a necessary aspect of ACS citations:

- Format: Inventor(s). Title of Patent. Country Patent Number, Year.
- Example:
- Doe, J. Innovative Chemical Composition for Cleaning. U.S. Patent 1234567, 2020.

Creating a Comprehensive Reference List

A well-organized reference list is vital for any scientific paper. Here are some tips to ensure that your reference list is comprehensive and correctly formatted.

Order and Formatting

- Order: For the numbered style, arrange references in the order they are cited in the text. For the author-date style, list them alphabetically.
- Formatting: Follow the specific formatting guidelines provided by the ACS, including italics for titles of books and journals, proper punctuation, and capitalization rules.

Consistency and Accuracy

- Be Consistent: Ensure that all entries in the reference list follow the same format. Inconsistencies can confuse readers and detract from the professionalism of your work.
- Check for Accuracy: Double-check publication details such as authorship, publication year, volume, and page numbers. Accuracy is critical in scientific writing, as errors can mislead readers.

Utilizing ACS Style Guides and Resources

The American Chemical Society provides extensive resources to help writers adhere to its citation format. These resources include:

ACS Style Guide

The ACS Style Guide is an indispensable resource for anyone writing in the field of chemistry. It offers detailed instructions on formatting citations, references, and overall manuscript preparation.

- Available in print and online, the guide covers various topics, including:
- General writing style and grammar
- Specific citation formats for different types of sources
- Guidelines for illustrations and tables

Online Citation Tools

Several online citation tools can assist in generating citations in ACS format. These tools can save time and reduce errors. Popular options include:

- Zotero
- EndNote
- Mendeley

However, always review generated citations for accuracy, as automated tools may make mistakes.

Common Mistakes to Avoid

In the process of citing sources, writers often make several common errors that can undermine the credibility of their work.

Inconsistent Formatting

One of the most frequent mistakes is inconsistent formatting throughout the reference list. Ensure that all entries follow the same style guidelines to maintain clarity.

Missing or Incorrect Information

Always double-check that all necessary information is included in citations. Missing elements, such as publication dates or page numbers, can hinder readers' ability to locate the original source.

Poor In-text Citations

In-text citations should correctly correspond to the reference list. Ensure that every citation in the text has a matching entry in the reference list and vice versa.

Conclusion

Mastering the American Chemical Society citation format is essential for anyone engaged in chemical research and writing. By following the guidelines outlined in this article, researchers can accurately cite a variety of

sources, create a well-organized reference list, and uphold the standards of academic integrity. Utilizing available resources, such as the ACS Style Guide and citation tools, can further enhance the writing process. Adhering to these practices will not only improve the quality of scientific communication but also contribute to the ongoing discourse in the field of chemistry.

Frequently Asked Questions

What is the American Chemical Society (ACS) citation format?

The ACS citation format is a specific style used for citing sources in chemistry and related fields, which includes guidelines for referencing books, journal articles, and other materials.

How do you cite a journal article in ACS format?

In ACS format, a journal article is cited using the format: Author(s). Title of the Article. Journal Name Year, Volume, Page range. For example: Smith, J. A.; Doe, J. B. Study of Chemical Reactions. J. Chem. Educ. 2020, 97, 1234-1240.

What information is required for citing a book in ACS format?

To cite a book in ACS format, you need the following information: Author(s), Title of the Book, Edition (if not the first), Publisher, Year of Publication. For example: Brown, R. C. Organic Chemistry; 3rd ed.; Wiley: New York, 2018.

How do you format citations in the bibliography section using ACS style?

In ACS style, citations in the bibliography section are listed in the order they are cited in the text, with a hanging indent for lines after the first line of each citation.

Are there any specific rules for citing websites in ACS citation format?

Yes, when citing websites in ACS format, include: Author(s), Title of the Webpage, Name of the Website, URL, and Access Date. For example: Johnson, A. Environmental Chemistry. Chemistry Online. Available at: www.chemistryonline.com. Accessed: October 10, 2023.

What is the format for citing conference proceedings in ACS style?

Citing conference proceedings in ACS format typically follows this structure: Author(s). Title of the Paper. In Title of the Conference; Location, Date; Publisher: City, Year; Page range. For example: Lee, S. K. Advances in Nanotechnology. In Proceedings of the National Conference on Nanotechnology; San Francisco, CA, April 2021; ACS Publications: Washington, DC, 2021; pp 45-50.

How should in-text citations be formatted in ACS style?

In ACS style, in-text citations are typically numbered sequentially as they appear in the text, using superscript or bracketed numbers (e.g., 'as noted in previous studies.¹' or 'previous studies (1)').

Is there a specific guide or resource for learning ACS citation format?

Yes, the American Chemical Society provides a comprehensive guide called the 'ACS Style Guide,' which can be found on their website and includes detailed instructions for citing various types of sources.
