## Understanding the Legislative Branch

The legislative branch of the American government is primarily responsible for creating laws, representing the interests of the public, and overseeing the executive branch. It is outlined in Article I of the U.S. Constitution and consists of two houses:

- The House of Representatives
- The Senate

Each house plays a distinctive role in the legislative process, with specific powers and responsibilities that ensure a system of checks and balances.

# The House of Representatives

The House of Representatives is comprised of 435 members, with the number of representatives from each state determined by its population. Key characteristics include:

- Term Length: Representatives serve two-year terms.
- Age Requirement: Candidates must be at least 25 years old.
- Citizenship: Must be a U.S. citizen for at least seven years.
- Leadership: The Speaker of the House is the presiding officer, elected by the members.

The House is responsible for initiating revenue bills and has the exclusive power to impeach federal officials.

## The Senate

The Senate consists of 100 members, with each state represented by two senators, regardless of population. Key characteristics include:

- Term Length: Senators serve six-year terms.
- Age Requirement: Candidates must be at least 30 years old.
- Citizenship: Must be a U.S. citizen for at least nine years.
- Leadership: The Vice President serves as the President of the Senate but only votes in the event of a tie. The Senate also elects a President pro tempore.

The Senate has the exclusive authority to confirm presidential appointments and ratify treaties.

## Legislative Process

Understanding the legislative process is essential for comprehending how laws are made and how governmental checks and balances function. The process can be divided into several key steps:

### 1. Introduction of a Bill

- A bill can be introduced in either house.
- Members of Congress, or sometimes the President, can propose legislation.

## **2. Committee Review**

- After introduction, the bill is sent to a committee for scrutiny.
- Committees can amend, reject, or recommend the bill for further consideration.

## **3. Debate**

- The bill is then debated on the floor of the house where it was introduced.
- Members can discuss its merits and propose further amendments.

## **4. Voting**

- After the debate, the bill is put to a vote.
- Approval requires a simple majority in both houses.

## **5. Conference Committee**

- If the bill passes in both houses but with different amendments, a conference committee reconciles the differences.
- The revised bill is then sent back for approval.

## **6. Presidential Action**

- The final version of the bill is presented to the President.
- The President can sign it into law, veto it, or allow it to become law without signing.

that are vital for understanding its functions:

## **Checks and Balances**
