1. Ecology Scavenger Hunt – you must share your work on your IUSD Google Drive account with me by midnight August 18th (day before school begins) using our AP Biology Summer Google Classroom Code [dud6ge7]. Questions? Email Mr Knight or Mr Shrake

Mr Knight davidknight@iUSD.org and Mr Shrake tomshrake@iUSD.org

Find and take a "selfie" with each item. Write a 4-5 sentence description to go with the selfie that includes a definition of the term represented by your image, but is not solely a definition. Explain how your image represents the term or concept. Image must actually show term, not just the possibility of the term. Create a Google doc or Google slide, doc., or a ppt. with the images and descriptions. **You need to be in the shot—if you cannot be in the photo due to the angle, put your UNI ID in the frame** No taking images off the internet! Each photo can only count for one item on the list but you have choices (see example).

OPTION A: TAKE A SELFIE – YOU IN AN ECOSYSTEM AND SCAVENGER HUNT.

Ecosystem. Description should include: type of ecosystem; type of biome the ecosystem is part of; location of ecosystem; 3 abiotic factors and 3 biotic factors of this ecosystem. Any interesting or relevant facts about the picture or location. This should be one or two paragraphs.

AND

Selfies. Choose any 50 items from the list, remember each object (selfie) can count only for one item on the list! You cannot use items from your ecosystem as any of the 50 items! **Give number and term for each photo.**

OPTION B: SELFIE SCAVENGER HUNT ONLY.

Take a selfie and write appropriate description for 60 of the items on the list below. Remember, each object (selfie) can count only for one item on the list! **Give number and term for each photo.**

3. **Assessment of Prior Knowledge:** Instructors can gauge students' backgrounds in biology, which helps in tailoring the curriculum to meet their needs.

Typical Topics Covered in Summer Assignments

AP Biology summer assignments often include a variety of topics that align with the AP curriculum framework. Here are some common areas of focus:

- **Cell Biology:** Understanding cell structure, function, and processes like cellular respiration and photosynthesis.
- **Genetics:** Basic principles of heredity, including Mendelian genetics and molecular genetics.
- **Evolution:** Fundamental concepts of evolution, natural selection, and population genetics.
- **Ecology:** Ecosystem dynamics, energy flow, and biogeochemical cycles.
- **Plant and Animal Systems:** Anatomy and physiology of plants and animals, including homeostasis and regulatory systems.

Components of a Summer Assignment

Most summer assignments will include a combination of written tasks, readings, and problem-solving exercises. Here's a breakdown of what students might expect:

1. **Reading Assignments:** Students may be asked to read specific chapters from an AP Biology textbook or provided articles that highlight essential concepts.
2. **Worksheets:** These can range from fill-in-the-blank exercises to more complex problem sets that require critical thinking and application of knowledge.
3. **Lab Reports:** Some assignments may include virtual lab simulations or real-life experiments that students need to document and analyze.
4. **Essays or Reflection Papers:** Students might be tasked with writing essays on topics such as the importance of biodiversity or the implications of genetic engineering.
5. **Quizzes or Practice Tests:** To evaluate comprehension, some assignments may include quizzes that mimic AP exam questions.

Tips for Completing the Summer Assignment

Completing the AP Biology summer assignment can be challenging, but with the right approach, students can navigate the process successfully. Here are some tips to keep in mind:
