Key Topics Covered in the SAA C03 Exam

The exam covers a wide range of topics. The following are the primary domains you should focus on while studying:

1. Domain 1: Design Resilient Architectures

This domain emphasizes creating architectures that are fault-tolerant and highly available. Key concepts include:

- Utilizing AWS services like Amazon Route 53, Elastic Load Balancing, and Auto Scaling.
- Implementing multi-AZ and multi-region architectures.

- Choosing the right storage solutions (e.g., Amazon S3, EBS, and EFS) that meet availability and durability requirements.

2. Domain 2: Design High-Performing Architectures

This domain focuses on optimizing performance. Key areas of study include:

- Selecting the appropriate instance types and sizes for workloads.
- Using AWS services that enhance performance, such as Amazon CloudFront and AWS Global Accelerator.
- Caching strategies using Amazon ElastiCache and Amazon DynamoDB Accelerator (DAX).

3. Domain 3: Design Secure Applications and Architectures

Security is paramount in cloud architecture. Key concepts include:

- Implementing AWS Identity and Access Management (IAM) for secure access control.
- Understanding security best practices for data at rest and data in transit.
- Utilizing Amazon VPC, security groups, and network ACLs for network security.

4. Domain 4: Design Cost-Optimized Architectures

Cost management is critical for cloud solutions. Focus on:

- Choosing the right pricing models (On-Demand, Reserved Instances, and Spot Instances).
- Implementing auto-scaling and load balancing to optimize resource usage.
- Identifying underutilized resources to reduce costs.

5. Domain 5: Define Operationally Excellent Architectures

This domain highlights operational efficiency. Study these aspects:

- Using AWS CloudTrail and Amazon CloudWatch for monitoring and logging.
- Implementing automation with AWS CloudFormation and AWS Elastic Beanstalk.
- Understanding the principles of DevOps and continuous integration/continuous deployment (CI/CD) on AWS.
