

# Basic Math Problems With Answers

What does the x equal in each of these equations?

1)  $2x + 4 = 14$

2)  $4x + 7 = 19$

3)  $6x + 5 = 23$

4)  $2x + 11 = 27$

5)  $5x + 9 = 29$

6)  $7x + 13 = 34$

7)  $4x + 3 = 35$

8)  $6x + 18 = 24$

9)  $9x + 5 = 104$

10)  $6x + 11 = 65$

11)  $3x - 7 = 20$

12)  $10x - 10 = 30$

13)  $6x - 2 = 28$

14)  $3x - 5 = 13$

15)  $5x - 8 = 27$

16)  $4x - 7 = 1$

17)  $8x - 6 = 18$

18)  $7x - 11 = 17$

19)  $9x - 21 = 60$

20)  $2x - 9 = 15$

**Basic math problems with answers** are essential for building a strong foundation in mathematics. Whether you are a student trying to grasp fundamental concepts or an adult looking to refresh your skills, understanding basic math problems is crucial. This article will explore various types of basic math problems, including arithmetic, algebra, geometry, and word problems, along with their solutions. By the end of this article, you will have a better grasp of fundamental math concepts and be equipped to tackle basic math problems with confidence.

## Arithmetic Problems

Arithmetic is the branch of mathematics dealing with the properties and manipulation of numbers. It includes operations such as addition, subtraction, multiplication, and division.

### 1. Addition Problems

Addition is the process of finding the total or sum by combining two or more numbers.

Example Problems:

1. What is  $8 + 5$ ?
2. What is  $15 + 27$ ?
3. What is  $100 + 250 + 300$ ?

Answers:

1.  $8 + 5 = 13$
2.  $15 + 27 = 42$
3.  $100 + 250 + 300 = 650$

## 2. Subtraction Problems

Subtraction is the operation of finding the difference between numbers.

Example Problems:

1. What is  $20 - 7$ ?
2. What is  $100 - 45$ ?
3. What is  $75 - 30 - 15$ ?

Answers:

1.  $20 - 7 = 13$
2.  $100 - 45 = 55$
3.  $75 - 30 - 15 = 30$

## 3. Multiplication Problems

Multiplication is a method of adding a number to itself a certain number of times.

Example Problems:

1. What is  $6 \times 4$ ?
2. What is  $12 \times 15$ ?
3. What is  $8 \times 7 \times 2$ ?

Answers:

1.  $6 \times 4 = 24$
2.  $12 \times 15 = 180$
3.  $8 \times 7 \times 2 = 112$

## 4. Division Problems

Division is the process of determining how many times one number is contained within another.

Example Problems:

1. What is  $36 \div 6$ ?
2. What is  $81 \div 9$ ?
3. What is  $144 \div 12 \div 3$ ?

Answers:

1.  $36 \div 6 = 6$
2.  $81 \div 9 = 9$
3.  $144 \div 12 \div 3 = 4$

# Algebra Problems

Algebra involves using symbols (often letters) to represent numbers in equations. It is a vital skill that allows for solving problems with unknown values.

## 1. Solving Simple Equations

Example Problems:

1. Solve for  $x$ :  $x + 5 = 12$
2. Solve for  $y$ :  $3y = 15$
3. Solve for  $z$ :  $z - 7 = 10$

Answers:

1.  $x + 5 = 12 \rightarrow x = 12 - 5 \rightarrow x = 7$
2.  $3y = 15 \rightarrow y = 15 \div 3 \rightarrow y = 5$
3.  $z - 7 = 10 \rightarrow z = 10 + 7 \rightarrow z = 17$

## 2. Working with Inequalities

Inequalities express a relationship where one side is not equal to the other, using symbols like  $>$  (greater than) or  $<$  (less than).

Example Problems:

1. Solve for  $x$ :  $x + 3 > 10$
2. Solve for  $y$ :  $2y < 8$
3. Solve for  $z$ :  $z - 5 \leq 4$

Answers:

1.  $x + 3 > 10 \rightarrow x > 10 - 3 \rightarrow x > 7$
2.  $2y < 8 \rightarrow y < 8 \div 2 \rightarrow y < 4$
3.  $z - 5 \leq 4 \rightarrow z \leq 4 + 5 \rightarrow z \leq 9$

# Geometry Problems

Geometry focuses on the properties and relations of points, lines, surfaces, and solids. Basic geometric problems often involve calculating areas, perimeters, and volumes.

## 1. Area of Shapes

Example Problems:

1. Find the area of a rectangle with a length of 5 units and a width of 3 units.
2. Find the area of a triangle with a base of 4 units and a height of 6 units.

3. Find the area of a circle with a radius of 3 units (use  $\pi \approx 3.14$ ).

Answers:

1. Area of rectangle = length  $\times$  width =  $5 \times 3 = 15$  square units
2. Area of triangle = (base  $\times$  height)  $\div 2 = (4 \times 6) \div 2 = 12$  square units
3. Area of circle =  $\pi \times \text{radius}^2 = 3.14 \times (3)^2 = 28.26$  square units

## 2. Perimeter of Shapes

Example Problems:

1. Find the perimeter of a rectangle with a length of 10 units and a width of 4 units.
2. Find the perimeter of a triangle with side lengths of 3 units, 4 units, and 5 units.
3. Find the circumference of a circle with a diameter of 10 units (use  $\pi \approx 3.14$ ).

Answers:

1. Perimeter of rectangle =  $2(\text{length} + \text{width}) = 2(10 + 4) = 28$  units
2. Perimeter of triangle =  $3 + 4 + 5 = 12$  units
3. Circumference of circle =  $\pi \times \text{diameter} = 3.14 \times 10 = 31.4$  units

## Word Problems

Word problems require translating narrative descriptions into mathematical equations. They can be challenging but are essential for practical application.

### 1. Basic Word Problems

Example Problems:

1. Sarah has 10 apples, and she gives 4 to her friend. How many apples does she have left?
2. A book costs \$15, and you buy 3 books. How much do you spend in total?
3. If a car travels 60 miles per hour for 2.5 hours, how far does it travel?

Answers:

1.  $10 - 4 = 6$  apples left
2.  $15 \times 3 = \$45$  total spent
3.  $60 \times 2.5 = 150$  miles traveled

### 2. Advanced Word Problems

Example Problems:

1. A rectangle has a length that is twice its width. If the width is 3 units, what is the area of the rectangle?
2. John has \$50. He spends \$20 on groceries and \$15 on gas. How much money does he have left?

3. If three friends share a pizza equally and the pizza has 8 slices, how many slices does each friend get?

Answers:

1. Width = 3 units, Length =  $2 \times 3 = 6$  units; Area = length  $\times$  width =  $6 \times 3 = 18$  square units
2.  $\$50 - \$20 - \$15 = \$15$  left
3.  $8 \text{ slices} \div 3 \text{ friends} = 2 \text{ slices each}$ , with 2 slices remaining

## Conclusion

Basic math problems encompass a wide range of topics, including arithmetic, algebra, geometry, and word problems. Mastering these concepts is vital for success in more advanced mathematics and everyday situations. The problems and solutions provided in this article serve as a starting point for practicing and understanding basic math. By regularly engaging with these problems, you can build your confidence and competence in mathematics. Remember, practice makes perfect, so keep challenging yourself with new problems!

## Frequently Asked Questions

**What is  $25 + 37$ ?**

62

**If you have 12 apples and you give away 5, how many apples do you have left?**

7

**What is the result of  $8 \times 9$ ?**

72

**What is 56 divided by 7?**

8

**If a rectangle has a length of 10 and a width of 4, what is its area?**

40

**What is the value of  $15 - 9$ ?**

6

**If you buy 3 notebooks for \$2 each, how much do you spend in total?**

\$6

**What is the perimeter of a square with a side length of 5?**

20

## **Basic Math Problems With Answers**

### **The Easiest Tuna Pasta Recipe - Simply Delicious**

Apr 2, 2025 · This tuna pasta recipes is so quick and easy, perfect for weeknight dinners. Ready in minutes, made with pantry staples, it's a delicious, budget-friendly meal.

### **Pasta with Tuna Sauce Recipe**

Mar 13, 2025 · This pasta with tuna is perfect for a busy weeknight. Top any pasta shape with canned tuna, tomatoes, garlic, parsley, and lemon juice, and dinner's done!

### **How to Cook Tuna Pasta Alfredo - Panlasang Pinoy**

Jun 19, 2020 · Tuna Pasta Alfredo is a good dish to make at this time. It is quick and easy to cook, and the ingredients are easy to source.

### **Creamy Tuna Pasta Recipe - Budget Bytes**

Jan 17, 2025 · This quick and comforting Creamy Tuna Pasta recipe is a fast and easy weeknight dinner that only requires a few simple ingredients.

### ***Easy Tuna Pasta Recipe (25-Minutes) - betterhomebase.com***

Looking for a quick and delicious meal? This easy tuna pasta recipe is packed with flavor, budget-friendly, and ready in 25 minutes.

### **ONE-PAN Tuna Spaghetti | Ridiculously GOOD 30 Minute Recipe**

Apr 12, 2024 · This ONE-PAN Tuna Spaghetti is packed with flavors, made with basic pantry staples and done in under 30 minutes. Easy One-Pan Pasta Recipe.

### **Easy Canned Tuna Pasta Ready in Minutes**

Apr 11, 2025 · This Tuna Pasta that cooks in just 20 minutes is made with olives, capers, and red pepper flakes in a rich tomato sauce!

### **Mediterranean Tuna Pasta Recipe - Simply Recipes**

Jul 13, 2025 · This quick and easy tuna fish pasta features canned tuna, fresh tomatoes, capers, red onion, mozzarella cheese, and kalamata olives.

### ***Tuna Pasta in 10 Minutes: A Quick and Flavorful Recipe***

Apr 7, 2025 · This recipe is a quick flavorful dish inspired by southern Italy. Make this Tuna Pasta in 10 min when craving carbs but short on ingredients.

### **Tuna Pasta Recipe -only 15 minutes to make! - She Loves Biscotti**

Sep 19, 2020 · If you like quick and easy weeknight dinners that are also healthy, this canned Tuna Pasta Recipe is for you. All you need are some simple ingredients and 15 minutes. ...

### *Easy Pasta with Tuna and Tomato Sauce - Recipes from Italy*

Mar 15, 2024 · Make a delicious pasta with tuna in just 20 minutes. Enjoy the intense flavor of tomato and the taste of tuna in this classic Italian recipe.

### **Easy Italian Tuna Pasta Recipe | Quick & Delicious Weeknight Meal**

This easy recipe features canned tuna, garlic, olive oil, and tomatoes for a flavorful weeknight dinner.

### **Creamy Tuna Pasta - Chelsea's Messy Apron**

Jun 17, 2025 · This Creamy Tuna Pasta recipe begins by boiling together fettuccine and sweet peas, then tossing them into a mouthwatering cream sauce.

### **How to make TUNA PASTA Like an Italian - Vincenzo's Plate**

Jun 3, 2025 · Indulge in a delectable and satisfying meal with tuna pasta. Enjoy the taste of Italy with this quick and easy dish perfect for any occasion.
