2.3 In the year 2050 we have two options.

- Option 1: \_\_\_\_\_
- Option 2: \_\_\_\_\_

2.3 Below are some of the things Bill predicted will occur if we go with Option 1. Fill in the missing information.

- We have already seen a 1.5 degree increase since 1880. If we continue down the path we will see a \_\_\_\_\_ increase leading to:

- o The \_\_\_\_\_, huge oxygen produced ending up like the African savannah.
- o Rocky Mountains \_\_\_\_\_
- o Colorado River \_\_\_\_\_ half of the year
- o Hurricanes increasing by \_\_\_\_\_ above the current highest category five.

2.3 If we go with Option 2, we will still have an increase of \_\_\_\_\_ degrees by 2050.

- To "hold the thermometer there" Bill states we must replace energy from coal, oil, and gas with energy from \_\_\_\_\_ and \_\_\_\_\_.

4.3 Bill discusses some of the things we can do to help. State at least 4 of the 7.
