

Bridges Out Of Poverty Training 2023

March 7-9, 2023 * Fairmont, MN

The Bridges Out of Poverty training is designed to give you a deeper understanding of poverty and what it is like for those living it. As you gain empathy and a better understanding of the challenges faced by people in poverty, you will be able to build relationships with those living in poverty and together create opportunities for success.

March 7 - Poverty from an Individual Lens: Transforming Course

This workshop is a comprehensive approach to understanding poverty. Bridges Out of Poverty uses the lens of economic class that provides concrete tools and strategies for a community to understand, address, and alleviate poverty. The training teaches community organizations, social service agencies, employers, and individuals in gaining insight and strategies to effectively create stability for all.

March 8 - Addressing Poverty from an Individual Lens

This session introduces change strategies for program design, policies, and procedures. The session is designed to take the concepts introduced in the Bridges Out of Poverty workshop and help participants begin embedding them at the operational level. (Must attend Foundational Course prior to this training)

March 9 - Addressing Poverty from an Organizational Lens

This workshop explores how to become a bridge community, how to work with all sectors and economic classes, and how to create a steering committee. The individual and organizational issues covered in the first two Bridges workshops are used to inform the third Bridges workshop, which looks toward building a sustainable Bridges community. Attention is given to the types of leaders needed for the initiative. Participants will look at researching for policy change at the local, state, and federal levels. (Must attend Foundational Course prior to this training)

Training workshops are 8 hours in length and will take place in Fairmont, MN. The training is free of charge thanks to a Health Equity grant received by Human Services of Parkland & Martin Counties. Training meals and refreshments are provided by the St. Lawrence Health Improvement Partnership (SHIP) grant.

Up to 10 stipends of \$100 per day are available to allow community members with travel expenses to attend the training. Stipends are also available for MSU-MN Health Science students and will be coordinated by the University's Center for Rural Behavioral Health.

Bridges Out of Poverty Training 2023 is an innovative approach aimed at addressing the complex issue of poverty in communities across the United States and beyond. This training program has gained traction in recent years as a comprehensive educational tool that equips individuals and organizations with the knowledge and skills needed to understand the dynamics of poverty. In 2023, the program continues to evolve, adapting to the needs of communities and enhancing its curriculum to ensure its relevance in a rapidly changing socio-economic landscape. This article delves into the key components of Bridges Out of Poverty Training, its objectives, methodologies, and the impact it has on participants and communities.

Understanding Poverty: A Framework for Change

Bridges Out of Poverty is built on the premise that to effectively address poverty, one must first understand its underlying causes, structures, and the experiences of those living in poverty. The training provides a framework that includes:

1. The Hidden Rules of Class

One of the foundational elements of the training is the examination of the hidden rules that govern different social classes. Participants learn how these rules can affect interactions between people from various economic backgrounds, leading to misunderstandings and reinforcing barriers. Key hidden rules include:

- **Economic Class:** Different classes have distinct values, priorities, and norms.
- **Social Networks:** The type of support available is often dictated by

economic status.

- Decision-Making: How individuals approach decision-making can vary greatly between classes.

2. The Impact of Relationships

Relationships play a critical role in escaping poverty. The training emphasizes the importance of building strong, supportive networks and understanding how these relationships can be leveraged for personal and community growth. Participants are encouraged to:

- Foster mentorship opportunities.
- Create connections with community resources.
- Engage in collaborative problem-solving.

3. Resources and Capacity Building

The Bridges Out of Poverty Training emphasizes the importance of resources—both tangible and intangible. Participants learn about:

- Financial Resources: Understanding budgeting, savings, and credit management.
- Emotional Resources: The significance of mental health and emotional support.
- Social Resources: Building networks and community connections.
- Spiritual Resources: Recognizing the role of faith and purpose in overcoming adversity.

Training Methodologies

The training involves a mix of theoretical knowledge and practical applications. This approach ensures that participants not only understand the concepts but also learn how to apply them in real-world scenarios. The methodologies include:

1. Interactive Workshops

Workshops are designed to engage participants actively, encouraging them to share their experiences and insights. This interaction fosters a sense of community and collective learning. Key activities during workshops may include:

- Group discussions on case studies.
- Role-playing exercises to simulate interactions across class lines.
- Problem-solving sessions focused on community challenges.

2. Guest Speakers and Panels

Inviting guest speakers from various backgrounds—such as former participants, community leaders, and experts in poverty alleviation—adds depth to the training. These speakers provide firsthand accounts of their experiences and insights, inspiring participants and offering practical advice.

3. Community Action Projects

Participants are often encouraged to undertake community action projects as part of their training. These projects allow them to apply their newly acquired knowledge, work collaboratively with others, and create tangible change in their communities. Examples of projects may include:

- Establishing a community resource fair.
- Developing financial literacy workshops.
- Creating mentorship programs for youth.

Target Audience

The Bridges Out of Poverty Training is designed for a diverse audience, including:

- **Community Leaders:** Individuals who have the power to influence change in their communities.
- **Social Workers:** Professionals who provide support and services to those living in poverty.
- **Educators:** Teachers and administrators who work with students from low-income backgrounds.
- **Business Leaders:** Employers who want to understand the challenges faced by their employees and customers.
- **Individuals in Poverty:** Those directly experiencing poverty can gain valuable insights to help navigate their circumstances.

Benefits of Bridges Out of Poverty Training

The training offers numerous benefits, both for participants and the communities they serve. Some of the key advantages include:

1. Enhanced Understanding of Poverty

Participants develop a nuanced understanding of poverty, moving beyond stereotypes and misconceptions. This understanding fosters empathy and compassion, essential qualities for effective service delivery and community engagement.

2. Improved Communication Skills

Training participants learn techniques for effective communication across class divides. They gain skills to engage in meaningful conversations with

individuals from different economic backgrounds, promoting dialogue and collaboration.

3. Empowerment and Self-Advocacy

Individuals living in poverty are empowered through the training to advocate for themselves and their communities. They learn how to identify and utilize resources effectively, enhancing their capacity to improve their circumstances.

4. Community Cohesion

As participants engage in collaborative projects and discussions, the training fosters a sense of community cohesion. This collective effort can lead to stronger networks and partnerships that enhance community resilience and capacity.

Impact and Success Stories

The impact of Bridges Out of Poverty Training is evident in numerous success stories from around the country. Communities that have implemented the training often report:

- Increased Collaboration: Diverse stakeholders begin to work together more effectively to address local challenges.
- Reduction in Stigma: Training fosters a more profound understanding of poverty, reducing stigma and fostering inclusion.
- Economic Development: Communities that engage with the training often see improvements in local economic conditions, driven by collaborative initiatives.

Case Study: A Community Transformation

One notable case study is a small town in the Midwest that implemented the Bridges Out of Poverty Training in 2022. Through workshops, community action projects, and ongoing collaboration, the town saw:

- A 30% increase in local job placement for individuals from low-income backgrounds.
- The establishment of a community resource center that provides financial literacy workshops and job training.
- Improved relationships between community organizations, local businesses, and residents.

Conclusion: A Pathway Out of Poverty

Bridges Out of Poverty Training 2023 represents a vital initiative aimed at fostering understanding, collaboration, and empowerment in the fight against

poverty. By equipping individuals and communities with the tools they need to navigate the complexities of poverty, this training not only transforms lives but also strengthens communities as a whole. As more organizations and individuals engage with this program, the potential for meaningful change continues to grow, paving the way for a future where poverty is not just managed but effectively addressed and reduced. Through education, empathy, and action, Bridges Out of Poverty offers a pathway toward a more equitable society for all.

Frequently Asked Questions

What is Bridges Out of Poverty training?

Bridges Out of Poverty training is a framework designed to help individuals and organizations understand the dynamics of poverty and develop strategies to assist those in poverty in achieving economic stability.

Who should attend Bridges Out of Poverty training?

The training is beneficial for social workers, educators, community leaders, healthcare professionals, and anyone involved in service provision or policy-making related to poverty alleviation.
