- **Duration:** Candidates are given 165 minutes to complete the exam.
- **Passing Score:** The minimum passing score is 750 on a scale of 100-900.

The exam covers a wide range of topics relevant to cybersecurity analysis, and understanding these topics will help you prepare for the types of questions you will encounter.

## Core Domains of the CSO-002 Exam

The CSO-002 exam is divided into several domains, each of which covers specific knowledge areas.

The following are the main domains evaluated in the exam:

### 1. Threat and Vulnerability Management

This domain focuses on identifying and analyzing vulnerabilities in systems and applications.

Questions may involve:

- Recognizing threat intelligence and its sources.
- Understanding vulnerability assessment tools and techniques.
- Analyzing threats and vulnerabilities to prioritize remediation efforts.

## **2. Security Architecture and Tool Sets**

This section assesses your knowledge of security architecture and tools used to protect systems. You might face questions regarding:

- Security frameworks and models.
- Security controls and their implementation.
- Configuration management and security automation tools.

## **3. Security Operations and Incident Response**

In this domain, the exam evaluates your ability to respond to incidents effectively. Expect questions about:

- Incident response processes and methodologies.
- Understanding security monitoring and detection techniques.
- Leveraging security information and event management (SIEM) tools.

## **4. Compliance and Assessment**

This domain focuses on regulatory compliance and risk management. Key areas include:

- Understanding compliance requirements and frameworks (e.g., GDPR, HIPAA).
- Performing security assessments and audits.
- Evaluating the effectiveness of security controls.

# Types of Questions in the CSO-002 Exam

When preparing for the **CYSA CSO-002** exam questions, it is essential to be familiar with the types of questions you may encounter. Here are some common formats:

## 1. Multiple-Choice Questions

These questions typically present a scenario or statement followed by several possible answers. You will need to select the most appropriate response.

## 2. Performance-Based Questions

Performance-based questions require you to demonstrate your skills in a simulated environment.

These may involve:

- Analyzing logs to identify security incidents.
- Configuring security settings on a virtual machine.
- Using cybersecurity tools to assess vulnerabilities.

## 3. Drag-and-Drop Questions

In drag-and-drop questions, you might be asked to match terms or concepts with their definitions or categorize items based on specific criteria.

# Study Strategies for the CSO-002 Exam

To effectively prepare for the CSO-002 exam, consider implementing the following study strategies:

## **1. Understand the Exam Objectives**
