## Data Analysis Worksheets

### Five Key Dimensions for Student Achievement

(The Data Analysis Worksheets are to be turned in at the end of the Written Plan)

**Purpose:** To analyze the Data Collection Worksheets onto these Data Analysis Worksheets so that data is seen as an area of strength or an area needing improvement.

**Directions:** As a team, begin discussing the data from the Data Collection Worksheets, decide which column the data should be included: Is it a perceived area of strength or a perceived area needing improvement? It is a good idea to write statements if possible, especially in the Areas Needing Improvement, as they will become the statements for the Prioritization of Needs in the next step. If there is no area of strength or need for that indicator, just write "none" so there is no question later.

This needs to be typed before submitting it with the Schoolwide Written Plan.
