Delirium

The first book, *Delirium*, introduces readers to a future society where love is classified as a disease known as "Amor Deliria Nervosa." The protagonist, Lena Haloway, is a seventeen-year-old girl who has grown up believing in the necessity of this cure. As she prepares for her own procedure, she meets Alex, a boy who challenges everything she has been taught about love and freedom. Their relationship ignites a journey of self-discovery and rebellion against societal norms.

The series culminates in a powerful exploration of freedom, love, and the fight for individuality.
