

Delta Math Answer Key

The screenshot displays the Delta Math Answer Key interface. At the top, it shows the given information: $\overline{AC} \perp \overline{BD}$ and $\overline{AB} \cong \overline{BC}$. Below this, the goal is to prove: $\triangle ABD \cong \triangle CBD$. A table for the proof process is visible, with columns for Step, Statement, and Reason. The first step is labeled 'Given' and contains the statements $\overline{AC} \perp \overline{BD}$ and $\overline{AB} \cong \overline{BC}$. Below the table, a diagram shows a triangle ABC with a point D on the base AC . A line segment BD is drawn from vertex B to point D . The segments AB and BC are marked with single tick marks, indicating they are congruent. The segments AD and CD are marked with double tick marks, indicating they are congruent. The angle ADB is marked with a right angle symbol, indicating it is a right angle. The angle CDB is also marked with a right angle symbol, indicating it is a right angle. The text 'State: the segment, \overline{AC} is a straight segment.' is visible at the bottom of the diagram.
