4. Self-Cleaning Feature: Many models include a self-cleaning option that uses high temperatures to burn off food residue.
5. Interior Lighting: Bright oven lights allow you to monitor your cooking without opening the door.

How to Use Your GE Gas Oven

Consulting your GE gas oven manual will provide you with detailed instructions on using the various features. However, here are some general guidelines to get you started.

Preheating the Oven

1. Turn the oven dial or press the keypad to select the desired temperature.
2. Wait for the oven to preheat, which usually takes about 10-15 minutes. Most models will indicate when they reach the set temperature with a beep or a light.

Baking and Broiling

- Broiling: Use the broil setting for meats and vegetables. Keep the oven door slightly ajar to allow heat to circulate.

Using the Self-Clean Feature

1. Remove all items from the oven, including racks, as they can warp during the cleaning cycle.
2. Set the oven to self-clean mode according to the instructions in your manual.
3. After the cycle is complete, allow the oven to cool before wiping away ash residue.
