### Is school cool?

**LINDSAY, 13:** What I really like about school is being with my friends during the breaks. But classes are fun and interesting too. For example, Music isn't difficult at all. I just don't like French so much because I don't understand it.

I'm very keen on sports too – I'm part of the school's basketball team. I started playing three years ago. Of course there are things I don't like. Some rules are very strict: we can't take our mobiles to school. I think we could take them to class if they were switched off.

**STEVE, 12:** Every morning when I wake up I feel bad, because I must go to school. Lessons are boring and I can't concentrate in class. My classmates are always talking. And some students call me names just because I'm very short. I also hate it when teachers give me lots of homework.

I never have lunch at school. It's a good thing that I don't have classes in the afternoon because the food is horrible.

**ADAM, 14:** The best thing about my school is our school library. There is an area where you can just sit and read quietly or do your homework.

I'm good at all of my subjects, except Physics. I never do well in it. My favourite subject is English. I like the

Guided reading activity 6 1 constitutional powers answers is a crucial topic for students and educators alike, as it delves into the foundational aspects of the United States Constitution and the powers it grants to various branches of government. This article will explore the constitutional powers defined in the U.S. Constitution, their implications, and some activities that can help reinforce understanding. By examining these elements, readers will gain a comprehensive understanding of how governance operates in the U.S.

## Understanding Constitutional Powers

The U.S. Constitution, ratified in 1788, is the supreme law of the land. It outlines the structure of the government, the powers of its branches, and the rights of citizens. Constitutional powers are divided primarily into three categories: enumerated powers, implied powers, and concurrent powers.

### Enumerated Powers

Enumerated powers are those explicitly granted to the federal government by the Constitution. They are primarily found in Article I, Section 8, and include:

1. **Levying taxes:** The federal government has the authority to impose and collect taxes to fund its operations.
2. **Regulating commerce:** The Constitution gives Congress the power to regulate interstate and international trade.
3. **Declaring war:** Only Congress has the authority to declare war, ensuring that such significant decisions are made by elected representatives.
4. **Coining money:** The federal government can create and regulate currency, ensuring a stable economic environment.
5. **Establishing post offices:** This power allows the government to create a postal service for communication and commerce.

## **Implied Powers**

Implied powers are not explicitly stated in the Constitution but are derived from the enumerated powers. The Necessary and Proper Clause, also known as the Elastic Clause, allows Congress to pass laws that are necessary to carry out its enumerated powers. Examples of implied powers include:

- **Establishing a national bank:** While the Constitution does not explicitly mention a national bank, it is deemed necessary for managing fiscal operations.
- **Regulating immigration:** The government can set policies regarding who may enter or remain in the country to protect national interests.

## **Concurrent Powers**

Concurrent powers are those that are shared by both the federal and state governments. These powers allow for a balance in governance. Examples include:

- **Collecting taxes:** Both state and federal governments can impose taxes on individuals and businesses.
- **Building roads:** This power allows both levels of government to construct and maintain infrastructure.
- **Establishing courts:** Both systems can create courts to enforce laws and resolve disputes.

## **Checks and Balances**

To prevent any one branch of government from becoming too powerful, the Constitution establishes a system of checks and balances. This system allows each branch to monitor and limit the actions of the others.

## **Legislative Branch Checks**

The legislative branch, primarily Congress, has several checks on the executive and judicial branches:

- **Impeachment Powers:** Congress can impeach and remove the president or federal judges.
- **Override Vetoes:** Congress can override a presidential veto with a two-

thirds majority vote in both houses.

- **Confirming Appointments:** The Senate must approve presidential appointments to the Supreme Court and other key positions.

## **Executive Branch Checks**

The executive branch, headed by the president, also has checks on the legislative and judicial branches:

- **Veto Power:** The president can veto legislation passed by Congress, preventing it from becoming law.
- **Calling Special Sessions:** The president can call Congress into special sessions to address urgent matters.
- **Judicial Appointments:** The president appoints judges to the federal courts, influencing the judiciary's composition.

## **Judicial Branch Checks**

The judicial branch has its own checks on the other branches:

- **Judicial Review:** The Supreme Court can declare laws or executive actions unconstitutional, effectively nullifying them.
- **Lifetime Appointments:** Federal judges serve for life, which allows them to make decisions free from political pressures.

## **Guided Reading Activities**

To effectively engage students with the material on constitutional powers, guided reading activities can be utilized. These activities should aim to enhance comprehension and critical thinking.

## **Activity Ideas**

1. **Group Discussions:** Organize students into small groups and assign each group a specific power (enumerated, implied, or concurrent). Have them discuss its significance and how it impacts governance.
2. **Power Mapping:** Create a visual map showing the relationship between the three branches of government and their respective powers. This helps students visualize the checks and balances system.
3. **Case Studies:** Present historical case studies where constitutional powers were exercised. For example, discuss the establishment of the First Bank of the United States as an implied power.
4. **Quizzes and Worksheets:** Develop quizzes that test students' understanding of key concepts related to constitutional powers. Worksheets can include matching terms to definitions or filling in the blanks.
5. **Mock Congress:** Conduct a mock Congress session where students propose and debate laws, simulating the legislative process and highlighting the enumerated powers of Congress.
