Understanding the Half Marathon

A half marathon is a race that spans 13.1 miles (21.1 kilometers), making it a popular choice for those looking to challenge themselves without committing to the full marathon distance. Training for a half marathon requires a structured plan to build both physical and mental endurance.

Why a 7-Week Plan?

Training for a half marathon typically takes several months, but a focused 7-week training plan can be effective for those who have a solid running base. Here are some reasons why a 7-week training plan can work:
