Consumption of food is a universal necessity. Different cultures have developed different methods to accomplish the task. It is interesting to discover these differences and learn new ways to do things.

European cultures developed cutlery (knives, forks, and spoons) to enable people to efficiently eat their food. Correct use of this tool changes with the times-what was polite in 1800 may not be considered proper manners today.

China developed the chopstick as an efficient tool for eating. Mastery of the use of chopsticks can be difficult for the person not raised in the culture. The attempts of a novice to use chopsticks can be very amusing to the watcher, but frustrating for the hungry diner.
