

# History Of The Entire World I Guess Script

Hi. You're on a rock floating in space. Pretty cool, huh? Some of its water. Fuck it, actually most of its water. I can't even get from here to there without buying a boat. It's sad. I'm sad. I miss you.

How did this happen? A long time ago, actually never and also (now) Nothing is nowhere. When? Never. Makes sense, right? Like I said, it didn't happen. Nothing was never anywhere. That's why it's been (everywhere). It's been so everywhere, you don't even need a where, you don't even need a when. That's how every it gets.

Forget this. I wanna be something, go somewhere, do something. I want things to change, I want to invent time and space. And I know it's possible because everything is here and it probably already happened. I just don't know when to start. And that's exactly when it's started.

Whoa, I paused it. I think there's a universe now. What's it made of? Quarks and stuff. Ah, that's a thing in a place. Don't like it? Try a new place at a different Time™. Try to stick together because the world's gonna get bigger. And emptier. But it's not empty yet, it's still very full, and about a kjghpillion degrees.

(about a second later) Great news! Quarks are now happily married in groups of three called a proton or a neutron, and there's something else flying around too (electron), that wants to join in but can't because it's still too **hot**.

(about ten minutes later) Great news! The protons and neutrons are now happily married to each other. Some of them even doubled up.

(about 380,000 years later) Great news! The electrons have now joined in. Congratulations, the world is now a bunch of gas in space, but it's getting closer together (gravity).

(10 million years later) And it's getting closer together (gravity).

(500 million years later) And it's getting closer together (gravity). It's a **star**. New shit just got made! Some stars burn out and die. Bigger stars burn out and die with **passion** (supernova) and make some brand new, way crazier shit, (space dust). Which allows new or more interesting stars to be made and then die in explodity. (Even crazier space dust.) So now stars have cool stuff around them, like: rocks, ice and funny clouds which can make some very interesting things like this ball of flaming rocks (earth) for example.

Holy shit! We just got hit with another ball of flaming rocks and it kinda made a mess, which is now the moon.

Weather update (year: -4,000,000,000): it's raining rocks from outer space.

Weather update: those rocks might've had water inside them and now there's hot steam in the sky.

Weather update: cooler temperature's today and the floor's no longer lava.

Weather update: it's raining. Severe flooding alert! The entire world is now an ocean.

Volcano alert! That's land!

There's something in the ocean. What? Something's alive in the ocean. Oh, cool. Like a plant, or an animal? No! A microscopic speck. It lives at the bottom of the ocean and eats chemical soup, which is being served hot and fresh made from gnarly space ingredients left over from when it was raining rocks or whatever. Oh yeah, and it can do that. It has

## History of the Entire World I Guess Script

The "History of the Entire World, I Guess" is a unique and engaging video created by Bill Wurtz that takes the viewer on a whirlwind tour of world history, encapsulating key events and developments over billions of years in a concise and entertaining format. Released in 2017, this video has gained immense popularity for its catchy tunes, vibrant visuals, and humorous narration. In this article, we will explore the content, structure, and impact of Wurtz's groundbreaking work, as well as its broader implications for the understanding of history in a digital age.

# Overview of the Script

The script of "History of the Entire World, I Guess" is structured in a way that allows for rapid-fire delivery of information, using a blend of humor and simplicity to make complex historical narratives accessible to a wide audience. The video covers significant milestones from the Big Bang to modern times, often in a tongue-in-cheek manner that resonates with viewers.

## Key Themes and Concepts

1. Brevity and Simplicity: Wurtz distills vast amounts of information into bite-sized pieces, making history approachable.
2. Humor and Wit: The use of humor keeps viewers engaged and entertained while educating them about historical facts.
3. Visual Aids: The colorful animations and graphics complement the narration, aiding in the retention of information.

## Historical Timeline in the Script

The script traverses a vast timeline, from the origins of the universe to contemporary events. Below are some of the key milestones outlined in the video:

### 1. The Beginning of Time

- The Big Bang: The universe begins, leading to the formation of galaxies and stars.
- Formation of Earth: Approximately 4.5 billion years ago, Earth forms, eventually leading to the emergence of life.

### 2. The Rise of Life

- Single-Celled Organisms: Life starts as simple cells in the oceans.
- Photosynthesis: The development of photosynthesis leads to oxygen production, transforming the atmosphere.

### 3. Evolution of Species

- Dinosaurs: These magnificent creatures dominate the Earth for millions of years.

- Mammals and Birds: After the extinction of dinosaurs, mammals and birds rise to prominence.

## **4. Human Civilization**

- Homo Sapiens: Modern humans emerge in Africa, later migrating across the globe.
- Agricultural Revolution: The shift from nomadic lifestyles to settled farming communities around 10,000 BCE.

## **5. Ancient Civilizations**

- Mesopotamia: Often referred to as the "cradle of civilization," where writing and urbanization began.
- Egypt: The development of a complex society with monumental architecture, including the pyramids.

## **6. Classical Antiquity**

- Greece and Rome: The flourishing of philosophy, democracy, and empire in the Mediterranean.
- Silk Road: The establishment of trade routes that connect the East and West.

## **7. The Middle Ages**

- Feudalism: The rise of feudal societies in Europe, characterized by a hierarchy of lords and vassals.
- Islamic Golden Age: A period of scientific, cultural, and economic flourishing in the Islamic world.

## **8. The Renaissance to the Modern Era**

- The Renaissance: A revival of art and learning in Europe, leading to significant advancements in various fields.
- Colonization: European powers expand their empires, impacting indigenous cultures around the world.

## **9. The 20th Century and Beyond**

- World Wars: Two major conflicts reshape global politics and society.
- Technological Advancements: The rise of the internet and digital technology transforms communication and information access.

## **Artistic Style and Presentation**

One of the standout features of Wurtz's video is its artistic style. The use of bright colors, whimsical animations, and a fast-paced musical score creates an immersive experience that captivates viewers. This approach contrasts sharply with traditional historical presentations, which often rely on lengthy texts and static images. Wurtz's decision to incorporate a musical element not only makes the content more enjoyable but also aids in memory retention, as viewers are likely to remember catchy tunes associated with key historical events.

## **Impact on Historical Education**

The "History of the Entire World, I Guess" script has significant implications for the field of historical education and public understanding of history:

### **1. Accessibility of Information**

- Engagement: The video format captures attention in ways that textbooks often fail to do.
- Diverse Audience: It appeals to various age groups, making history enjoyable for children and adults alike.

### **2. Encouraging Further Exploration**

- Inspiration: Viewers may feel motivated to learn more about specific historical events or periods mentioned in the video.
- Discussion Starter: It serves as a springboard for discussions about history, culture, and society.

### **3. Critique of Traditional Narratives**

- Non-linear History: Wurtz's approach challenges the conventional linear

narrative of history, suggesting that history is more interconnected and complex.

- **Humor in Serious Topics:** By presenting serious topics with humor, viewers are encouraged to think critically about historical events and their implications.

## **Conclusion**

The "History of the Entire World, I Guess" script by Bill Wurtz is a remarkable blend of education and entertainment that has changed how many perceive and engage with history. By distilling complex narratives into an accessible format, Wurtz has opened the door for a new generation of learners who may not have been inclined to explore history through traditional means. As we navigate an increasingly digital world, the importance of engaging educational content like Wurtz's cannot be overstated. It serves as a reminder that history can be fun, vibrant, and relevant to our lives today.

## **Frequently Asked Questions**

### **What is the 'History of the Entire World, I Guess' script about?**

The script is a humorous and fast-paced summary of the history of the world, covering major events and milestones from the Big Bang to modern times.

### **Who created the 'History of the Entire World, I Guess' video?**

The video was created by Bill Wurtz, known for his unique style of music and animation.

### **What makes the 'History of the Entire World, I Guess' script unique?**

Its unique blend of catchy music, minimalist animation, and an informal tone make it both entertaining and educational.

### **How long is the 'History of the Entire World, I Guess' video?**

The video is approximately 20 minutes long, which is relatively short for a comprehensive overview of world history.

## **What are some key events mentioned in the script?**

The script touches on significant events, such as the formation of the Earth, the rise and fall of empires, and major technological advancements.

## **What is the tone of the 'History of the Entire World, I Guess' script?**

The tone is light-hearted and comedic, providing a contrast to the often serious subject matter of history.

## **How has the 'History of the Entire World, I Guess' video been received by audiences?**

The video has been widely praised for its creativity and educational value, gaining millions of views and a strong following.

## **Does the script cover non-Western history?**

Yes, the script includes references to various cultures and civilizations from around the world, aiming for a more global perspective.

## **What influence has the 'History of the Entire World, I Guess' had on educational content?**

It has inspired a new wave of educational content creators to adopt similar styles that combine humor with information.

## **Are there any sequels or follow-up videos to 'History of the Entire World, I Guess'?**

As of now, there are no direct sequels, but Bill Wurtz has created other videos that continue his unique storytelling style.
