## Using the Imperia Pasta Machine: A Step-by-Step Manual

To get started with your Imperia pasta machine, follow these steps for optimal results:

### 1. Prepare the Dough

Before using the pasta machine, you need to prepare the pasta dough. Here's a simple recipe:

- Ingredients:

- 2 cups of all-purpose flour
- 3 large eggs
- A pinch of salt
- A drizzle of olive oil (optional)

- Instructions:

1. Place the flour on a clean work surface, creating a well in the center.
2. Crack the eggs into the well and add salt and olive oil.
3. Gradually mix the flour into the eggs using a fork, until a shaggy dough forms.
4. Knead the dough for about 10 minutes until smooth and elastic.
5. Wrap the dough in plastic wrap and let it rest for at least 30 minutes.

## 2. Setting Up the Machine

- Place the Imperia pasta machine on a flat, stable surface.
- Ensure that all parts are securely fastened.
- If your model has a clamp, use it to secure the machine to the table or countertop to prevent slipping during use.

## 3. Rolling the Dough

1. Divide the Dough: After resting, divide the dough into four equal portions. Keep the unused portions covered to prevent drying out.
2. Flatten the Dough: Take one portion and flatten it slightly with your hands.
3. Set the Thickness: Start with the widest setting on the machine and gradually decrease the thickness as you roll the dough.
4. Feed the Dough: Pass the flattened dough through the rollers of the machine. Use the handle to crank the machine, ensuring that the dough is evenly fed through.
5. Fold and Repeat: If the dough is sticky, dust it with a little flour. Fold the dough over itself and pass

it through the machine again. Repeat this process until you achieve the desired thickness.

## **4. Cutting the Pasta**

- Once you have rolled your dough to the desired thickness, you can cut it into shapes:
  1. If your model includes cutting attachments, simply switch the attachment and feed the rolled dough through the cutter.
  2. For fettuccine or tagliatelle, use the appropriate cutter and let the cut pasta hang to dry on a pasta drying rack or a clean kitchen towel.

## **5. Cooking the Pasta**

- Fresh pasta cooks much quicker than dried pasta. Bring a pot of salted water to a boil and cook the pasta for 2-4 minutes, depending on the thickness. Always taste to check for doneness.

## **Maintenance and Care of the Imperia Pasta Machine**

To ensure the longevity of your Imperia pasta machine, regular maintenance is essential. Here are some care tips:

### **1. Cleaning**

- After each use, allow the machine to cool down.
- Wipe the exterior with a damp cloth. Avoid submerging it in water or using harsh detergents.
- Use a soft brush or a dry cloth to remove any flour or dough remnants from the rollers.

## 2. Lubrication

- Periodically check the gears and moving parts for any signs of wear.
- Apply a small amount of food-grade lubricant to the gears if necessary.

## 3. Storage

- Store the pasta machine in a cool, dry place.
- If possible, keep it in its original packaging or a protective case to prevent scratches or damage.

## Troubleshooting Common Issues

While the Imperia pasta machine is generally reliable, you may encounter some common issues. Here are solutions to these problems:

### 1. Dough Sticking

- If your dough is sticking to the machine, it may be too wet. Dust it lightly with flour or let it rest for a bit longer.

### 2. Uneven Thickness

- If the pasta comes out uneven, ensure that you are feeding the dough straight through the rollers. Adjust the thickness settings gradually for better control.

### **3. Cuts Not Uniform**

- If the cutter is not producing uniform shapes, check the blade for any obstructions or damage. Ensure it is securely attached before cutting.

## **Conclusion**

The Imperia pasta machine manual provides a comprehensive guide for using this versatile kitchen tool. By following the steps outlined above, you can enjoy the delightful experience of making fresh pasta at home.
