

# International Society Of Glomerular Disease

## INTRODUCTION OF THE INTERNATIONAL SOCIETY OF GLOMERULAR DISEASE

A SPECIAL GLOMERULAR DISEASE SESSION AT  
**APCN & KSN 2024**

**14 JUNE 2024**

**09:00 AM~10:00 AM**

**ROOM 6 (203)**

**COEX, SEOUL**

SCAN TO ADD TO YOUR CALENDAR

**09:00~09:10**

**Welcome and Get Together**

**09:10~09:25**

**Perspectives of the ISGD**

Tobias B. Huber (President of ISGD)

**09:25~09:30**

**Brief Introduction of ISGD Centers of Excellence**

Sydney Tang (ISGD Committee Lead, President of APSN)

**09:30~09:35**

**Welcome Remarks**

Hyeong Cheon Park (APSN Honorary Secretary)

**09:35~09:50**

**Short Presentation by the KSN's Glomerular  
Disease Working Group**

Sehoon Park (Seoul National University Hospital)

**09:50~10:00**

**Discussion and Get Together**

THE KOREAN SOCIETY  
OF NEPHROLOGY

International Society of Glomerular Disease (ISGD) is a global organization dedicated to advancing the understanding and treatment of glomerular diseases—conditions that affect the kidney's filtering units, known as glomeruli. This society serves as a platform for healthcare professionals, researchers, and academics to collaborate, share knowledge, and foster innovation in the field of nephrology. With an emphasis on education, research, and clinical practice, the ISGD plays a pivotal role in improving patient outcomes and promoting scientific advancements in glomerular health.

## Background and History

The International Society of Glomerular Disease was founded in response to the growing need for a specialized organization focused exclusively on glomerular diseases. Recognizing that these conditions can lead to severe complications, including kidney failure, hypertension, and

cardiovascular issues, the founding members aimed to create a collaborative environment where experts could share insights and strategies for management and research.

## **Founding Members and Objectives**

The ISGD was established by a diverse group of nephrologists, pathologists, and researchers who recognized the need for a unified approach to glomerular disease. Its primary objectives include:

1. **Facilitating Research:** Promoting research initiatives aimed at understanding the mechanisms, diagnosis, and treatment of glomerular diseases.
2. **Enhancing Education:** Providing educational resources and training programs for healthcare professionals to improve their knowledge and skills in managing glomerular diseases.
3. **Promoting Collaboration:** Encouraging interdisciplinary collaboration among various specialties involved in the care of patients with kidney diseases.
4. **Advocating for Patients:** Raising awareness about glomerular diseases and advocating for patient rights and access to quality care.

## **Membership and Community Engagement**

The ISGD prides itself on its diverse membership, which includes nephrologists, researchers, pathologists, and allied health professionals from around the world. The society aims to foster a sense of community among its members through various initiatives.

### **Membership Benefits**

Members of the ISGD enjoy several benefits, including:

- **Access to Research:** Members receive updates on the latest research findings, clinical trials, and treatment guidelines pertaining to glomerular diseases.
- **Networking Opportunities:** The society hosts annual meetings and conferences that provide members with opportunities to connect with peers, share research, and discuss clinical practices.
- **Educational Resources:** Members gain access to a wealth of educational materials, including webinars, online courses, and publications that focus on glomerular disease.
- **Collaborative Projects:** Opportunities to participate in collaborative research projects and initiatives that aim to improve patient care.

## Annual Meetings and Conferences

The ISGD hosts annual meetings that serve as a platform for presenting the latest research and developments in the field. These meetings typically feature:

- Keynote Speakers: Renowned experts in nephrology share their insights on current challenges and future directions in glomerular disease research.
- Abstract Presentations: Members present their research findings, fostering an environment of knowledge exchange.
- Workshops and Symposia: Specialized sessions that focus on specific aspects of glomerular disease, providing in-depth discussions and practical applications.
- Networking Events: Opportunities for members to connect with each other, share experiences, and discuss potential collaborations.

## Research and Publications

Research is at the heart of the ISGD's mission. The society encourages studies that enhance the understanding of glomerular diseases and informs clinical practice.

### Research Initiatives

The ISGD supports various research initiatives, including:

- Clinical Trials: Facilitating the design and implementation of clinical trials aimed at evaluating new treatment modalities for glomerular diseases.
- Translational Research: Encouraging studies that bridge the gap between laboratory findings and clinical applications, improving patient outcomes.
- Registry Development: Establishing patient registries to collect data on glomerular diseases, which can inform future research and clinical guidelines.

### Publications and Journals

The ISGD is associated with several high-impact journals that publish cutting-edge research in nephrology. Members are encouraged to submit their research findings to these journals, contributing to the global body of knowledge on glomerular diseases. Additionally, the society releases newsletters and reports that summarize recent advancements and ongoing projects.

# Education and Training Programs

Education is a fundamental component of the ISGD's activities. The society provides a variety of training programs designed to enhance the skills and knowledge of healthcare professionals involved in the care of patients with glomerular diseases.

## Fellowship Programs

The ISGD offers fellowship programs that allow emerging nephrologists and researchers to gain hands-on experience in the field of glomerular disease. These programs typically include:

- Clinical Rotations: Opportunities to work alongside experienced nephrologists in clinical settings, enhancing diagnostic and management skills.
- Research Projects: Participation in ongoing research projects that contribute to the understanding of glomerular diseases.
- Mentorship: Access to mentorship from leading experts in nephrology, fostering professional growth and development.

## Webinars and Online Learning

In addition to in-person training, the ISGD provides a range of online educational resources, including:

- Webinars: Regularly scheduled webinars that cover various topics related to glomerular disease, allowing members to learn from experts in real-time.
- Online Courses: Comprehensive courses that delve into specific aspects of glomerular diseases, from pathophysiology to treatment strategies.
- Resource Libraries: A collection of articles, guidelines, and educational materials that members can access at any time.

## Global Impact and Outreach

The ISGD is committed to making a global impact in the field of nephrology. Through outreach initiatives, the society aims to improve awareness and management of glomerular diseases worldwide.

## Global Collaborations

The ISGD collaborates with other international organizations to address the challenges of glomerular

diseases on a global scale. These collaborations may include:

- Joint Conferences: Hosting conferences with other nephrology-focused organizations to broaden the reach and impact of education and research.
- Research Partnerships: Collaborating on multinational research projects that aim to understand the epidemiology and treatment of glomerular diseases in diverse populations.
- Public Health Initiatives: Engaging in public health campaigns to raise awareness about the importance of kidney health and the impact of glomerular diseases.

## **Patient Advocacy and Support**

The ISGD recognizes the importance of patient advocacy in the management of glomerular diseases. The society is involved in efforts to:

- Raise Awareness: Conducting campaigns to educate the public about glomerular diseases, their symptoms, and the importance of early detection.
- Support Groups: Establishing support groups for patients and their families, providing them with resources and a community for sharing experiences.
- Access to Care: Advocating for policies that ensure patients have access to necessary treatments and healthcare services.

## **Future Directions**

As the field of nephrology continues to evolve, the ISGD is poised to play a crucial role in shaping the future of glomerular disease research and treatment.

## **Innovations in Treatment**

With advancements in medical technology and research, the ISGD is focused on:

- Personalized Medicine: Exploring the potential of personalized treatment approaches based on genetic and molecular profiling of patients with glomerular diseases.
- Novel Therapies: Investigating new therapeutic agents and treatment modalities that may improve patient outcomes.
- Telemedicine: Expanding access to care through telemedicine initiatives, particularly for patients in underserved areas.

# **Strengthening Global Networks**

The ISGD aims to strengthen its global networks by:

- Expanding Membership: Encouraging more healthcare professionals from diverse backgrounds to join the society, fostering a richer exchange of ideas and experiences.
- Increased Collaboration: Seeking partnerships with other organizations to enhance research and educational opportunities.
- Global Conferences: Organizing more international conferences that bring together experts from various countries to share knowledge and best practices.

In conclusion, the International Society of Glomerular Disease is at the forefront of addressing the challenges posed by glomerular diseases. Through its commitment to research, education, and collaboration, the ISGD aims to improve patient outcomes and contribute to the global understanding of kidney health. As the society continues to expand its reach and impact, it remains dedicated to advancing the field of nephrology and supporting healthcare professionals in their efforts to provide the best possible care for patients with glomerular diseases.

## **Frequently Asked Questions**

### **What is the International Society of Glomerular Disease (ISGD)?**

The International Society of Glomerular Disease (ISGD) is a global organization dedicated to advancing research, education, and clinical practice related to glomerular diseases, which affect the kidneys' filtering units.

### **What are the primary goals of the ISGD?**

The primary goals of the ISGD include promoting research in glomerular diseases, providing educational resources for healthcare professionals, and fostering collaboration among scientists and clinicians worldwide.

### **How does the ISGD support research in glomerular diseases?**

The ISGD supports research through grants, organizing scientific meetings, and publishing findings in their official journals, thereby facilitating the exchange of knowledge among researchers and clinicians.

### **What types of diseases are focused on by the ISGD?**

The ISGD focuses on various glomerular diseases, including but not limited to minimal change disease, focal segmental glomerulosclerosis, membranous nephropathy, and IgA nephropathy.

## How can healthcare professionals get involved with the ISGD?

Healthcare professionals can get involved with the ISGD by becoming members, participating in educational events, contributing to research initiatives, and engaging in discussions on best practices in glomerular disease management.

## What recent initiatives has the ISGD launched to enhance patient care?

Recent initiatives by the ISGD include developing clinical practice guidelines for managing glomerular diseases, creating patient education resources, and promoting awareness campaigns to improve early diagnosis and treatment.
