### 2. Training Intensity and Paces

Understanding the various training paces is vital for effective training. Daniels categorizes training into different intensity levels, each serving a specific purpose:

- **Easy pace:** A comfortable pace for recovery runs and long runs.
- **Marathon pace:** The pace at which one would run a marathon, focusing on endurance.

Incorporating these paces into a training regimen allows runners to target different energy systems and improve overall performance.

### **3. The Role of Aerobic Conditioning**

Daniels places significant emphasis on aerobic conditioning as the foundation for all running performance.
