Step-by-Step Setup Guide

1. Insert Batteries: Open the battery compartment located at the back of the remote and insert two AAA batteries, ensuring they are placed in the correct orientation.

2. Power On the Device: Turn on the device you want to control (TV, DVD player, etc.) manually.

3. Enter Setup Mode: Press and hold the 'SETUP' button until the red indicator light turns on, then release the button.

4. Select Device Type: Press the button corresponding to the device you want to program (TV, DVD, etc.). The red indicator will blink and then turn off.

5. Program the Device: Press the 'POWER' button repeatedly until the device turns off. This may take several attempts, as the remote is searching for the correct code.

6. Store the Code: Once the device turns off, press the 'ENTER' button to store the code. The red indicator will blink and turn off.

7. Test the Remote: Finally, test the remote by turning the device back on using the 'POWER' button. If it works, the setup is complete!

Manual Code Entry

If the auto-search method does not work, you can enter the code manually. Follow these steps:

1. Find the code list specific to your device brand in the manual.
2. Follow steps 1 to 4 from the setup guide.
