Origins of Elvish Languages

Tolkien created multiple Elvish languages, primarily Quenya and Sindarin, which have distinct writing systems and historical significance.

2. Writing System: Quenya was primarily written using the Tengwar script, which was developed by the Elves of Middle-earth.
3. Cultural Significance: In the lore, Quenya served as the language of lore and poetry, often used by the Eldar and the nobility.

Sindarin

Sindarin, another prominent Elvish language, evolved from an earlier language called Telerin, which was spoken by the Teleri Elves.

1. Influences: Sindarin draws upon Welsh, Old English, and other Celtic languages.
2. Writing System: Like Quenya, Sindarin is also often represented in Tengwar but has its unique phonetic nuances.
3. Cultural Significance: Sindarin became the lingua franca of the Elves in Middle-earth and was widely used among them.

The Tengwar Script

The Tengwar script is perhaps the most recognizable aspect of Elvish writing. Developed by Fëanor, one of the most gifted Elves, this script embodies the elegance and complexity of Elvish languages.

Characteristics of Tengwar

1. Consonantal Base: Tengwar is primarily a consonantal alphabet (abjad) where vowels are indicated with diacritics, making it unique compared to other writing systems.
2. Shapes and Forms: The letters, known as tengwar, consist of flowing forms that often mimic the natural environment, reflecting the essence of Elvish aesthetics.
3. Modes of Writing: There are different modes for writing Tengwar, each adapted for various languages, including Quenya and Sindarin. Each mode has specific characters for vowels and consonants.

Basic Structure of Tengwar

- Tengwar Characters: There are 24 basic tengwar characters, divided into two categories:
- Tengwar (Consonants): Each tengwa corresponds to a consonant sound.
- Tehtar (Vowels): Vowels are represented by diacritical marks placed above or below the tengwar.
- Example of Tengwar Characters:
- T (tinco): Represents the 't' sound.
- L (lambe): Represents the 'l' sound.
- N (numen): Represents the 'n' sound.

Writing Systems in Literature

Tolkien utilized the Tengwar script in various works, often embedding it into the narrative to enhance the authenticity of his world.

1. The Lord of the Rings: The inscription on the One Ring is famously displayed in Tengwar. It reads: “Ash nazg durbat ulûk, agh burzum-ishi krimpatul.” This phrase translates to “One Ring to rule them

all, One Ring to find them, One Ring to bring them all and in the darkness bind them.”

2. The Silmarillion: This collection of tales showcases Quenya and Sindarin, often using Tengwar to depict the grandeur of Elvish history.
