

Maths Questions For Class 5

PART-A

I. Multiple choice questions.

$$5 \times \frac{1}{2} = 2\frac{1}{2}$$

1. Place value of the encircled digit in 2 3⑤4 6 is -
(a) 500 (b) 546 (c) 540 (d) 5 ()
2. Product of 148×20 is -
(a) 2960 (b) 3960 (c) 14820 (d) 2860 ()
3. Which one is divisible by 2 -
(a) 111 (b) 755 (c) 752 (d) 939 ()
4. H.C.F. of two prime numbers is -
(a) 1 (b) 2 (c) 0 (d) 3
5. $\frac{2}{5}$ of 25 is -
(a) 10 (b) $\frac{5}{2}$ (c) 5 (d) 50

II. Fill in the blanks.

$$5 \times \frac{1}{2} = 2\frac{1}{2}$$

1. Successor of 100 is
2. Which is smaller ? 2, 86, 782 OR 62, 38, 617
.....

Maths questions for class 5 are crucial for building a solid foundation in mathematical concepts that students will encounter in higher grades. At this level, students typically learn a variety of topics including arithmetic, geometry, fractions, decimals, and basic algebra. This article aims to provide a comprehensive guide to maths questions for class 5, including different types of questions, tips for success, and resources for further practice.

Understanding the Curriculum for Class 5 Maths

Before diving into specific maths questions, it's important to understand the curriculum outline for class 5. The focus areas generally include:

- Whole Numbers
- Fractions and Decimals
- Measurement

- Geometry
- Data Handling
- Patterns and Algebra

Each topic builds on what students have learned in previous grades and sets the groundwork for more advanced mathematical concepts.

Types of Maths Questions for Class 5

Class 5 maths questions can be categorized into several types based on the topics covered. Here are some common types of questions:

1. Arithmetic Questions

Arithmetic forms the backbone of mathematics. Here are some examples:

- Addition and Subtraction:
 - What is $456 + 789$?
 - Subtract 234 from 567.
- Multiplication and Division:
 - Calculate 12×15 .
 - If 144 is divided by 12, what is the quotient?

2. Fractions and Decimals

Understanding fractions and decimals is essential. Questions may include:

- Fractions:
 - Simplify the fraction $12/16$.
 - If you have $3/4$ of a pizza and eat $1/4$, how much pizza is left?
- Decimals:
 - Add 3.75 and 2.40.

- What is $5.6 - 2.3$?

3. Measurement Questions

Measurement questions may involve length, weight, and volume. Examples include:

- Convert 5 meters into centimeters.
- If a pencil weighs 20 grams, how much do 10 pencils weigh?

4. Geometry Questions

Geometry introduces shapes and their properties. Sample questions are:

- What is the perimeter of a rectangle with length 8 cm and width 5 cm?
- How many sides does a hexagon have?

5. Data Handling Questions

Data handling involves interpreting information from graphs and charts. Some questions could be:

- If a bar graph shows the number of books read by students, what is the total number of books read?
- What is the mode of the following data set: 2, 3, 3, 5, 7, 9?

6. Pattern and Algebra Questions

These questions introduce basic algebraic concepts:

- If $x + 5 = 12$, what is the value of x ?
- Identify the pattern and find the next number in the sequence: 2, 4, 6, 8, ____.

Tips for Solving Class 5 Maths Questions

To excel in class 5 maths, students should adopt effective strategies. Here are some useful tips:

1. Practice Regularly

Consistent practice helps solidify concepts. Allocate time each day to work on maths problems.

2. Understand Concepts, Don't Just Memorize

It's essential to grasp the underlying concepts rather than rote memorization. This understanding will be beneficial in advanced topics.

3. Use Visual Aids

Visual aids such as graphs, charts, and diagrams can help in understanding complex topics more easily.

4. Work with Peers

Studying with friends can provide different perspectives on problem-solving and make learning more enjoyable.

5. Seek Help When Needed

If a concept is difficult to grasp, don't hesitate to ask teachers or tutors for clarification.

Resources for Practicing Class 5 Maths

There are various resources available to help students practice maths questions for class 5. Here are some recommended ones:

1. Textbooks

Standard textbooks prescribed by educational boards provide a structured approach to learning, complete with exercises at the end of each chapter.

2. Online Learning Platforms

Websites like Khan Academy, IXL, and Math Playground offer interactive lessons and practice questions tailored for class 5 students.

3. Worksheets

Printable worksheets available online can provide additional practice. Websites like Education.com and Teachers Pay Teachers offer free and paid worksheets.

4. Educational Apps

Mobile apps such as Photomath, Prodigy, and Mathway can make learning fun and engaging while providing instant feedback.

5. YouTube Channels

Many educational YouTube channels offer math tutorials that explain concepts in a visual and engaging manner. Channels like Math Antics and Numberphile can be particularly helpful.

Conclusion

In summary, **maths questions for class 5** play a vital role in developing a student's mathematical skills. By understanding the curriculum, practicing regularly, and utilizing available resources, students can not only excel in their current studies but also build a strong foundation for future mathematical concepts. Whether it's arithmetic, geometry, or data handling, mastering these topics will prepare students for the challenges of higher education. Happy learning!

Frequently Asked Questions

What is the value of 6×7 ?

If a rectangle has a length of 8 cm and a width of 5 cm, what is its area?

40 cm²

What is 15% of 200?

30

What is the perimeter of a square with a side length of 4 cm?

16 cm

If you have 3 apples and you buy 5 more, how many apples do you have in total?

8 apples

What is the smallest prime number?

2

What is the result of 100 divided by 4?

25

How many degrees are in a right angle?

90 degrees

What is the next number in the sequence: 2, 4, 6, 8, ...?

10

If a triangle has sides of lengths 3 cm, 4 cm, and 5 cm, what type of triangle is it?

It is a right triangle.
