a. Determine the average velocity of the object.

8.33 m/s

b. Write a mathematical model to describe the motion of the object.

$S = 8.33\frac{m}{s}(t) + 10\ m$

2. Shown below is a velocity vs. time graph for an object.

a. Describe the motion of the object.

0-2 s → Forward @ 4 m/s
2-3 s → Reverse @ 3 "
3-5 s → stopped

b. Draw a corresponding position vs. time graph. Number the axes. You may assume the object starts from the origin.
