Sample Questions from the Orleans Hanna Algebra Prognosis Test

Below are some sample questions that reflect the style and substance of the Orleans Hanna Algebra Prognosis Test. These questions cover a range of topics commonly found on the test.

1. Multiple-Choice Questions

Question 1: What is the value of x in the equation $3x + 5 = 20$?

A) 5
B) 10
C) 15
D) 20

Question 2: Which of the following expressions is equivalent to $2(x + 3) - 4$?

A) $2x + 6 - 4$
B) $2x + 2$
C) $2x + 8$
D) $2x - 1$

Question 3: If $f(x) = 2x^2 + 3$, what is $f(2)$?

A) 7
B) 14
C) 10
D) 12

2. Open-Ended Questions

Question 4: Solve the equation $4x - 7 = 13$ and explain each step in your solution.

Answer:
1. Start with the equation: $4x - 7 = 13$.
2. Add 7 to both sides: $4x = 20$.
3. Divide both sides by 4: $x = 5$.

Question 5: Explain how you would determine if the equation $y = 2x + 3$ is a function. Provide reasoning for your answer.

Answer:
To determine if an equation represents a function, we check if each input (x-

value) has exactly one output (y-value). In the equation $y = 2x + 3$, for every x, there is a unique y calculated by multiplying x by 2 and adding 3. Thus, it is a function.

3. Word Problems

Question 6: A rectangle has a length that is 3 times its width. If the perimeter of the rectangle is 48 units, what are the dimensions of the rectangle?

Answer:
Let the width be w. Then the length is $3w$.
The perimeter P is given by the formula:
$$P = 2(\text{length} + \text{width})$$
So:
$$48 = 2(3w + w)$$
$$48 = 2(4w)$$
$$48 = 8w$$
Dividing both sides by 8 gives:
$$w = 6$$
Thus, the dimensions are:
- Width = 6 units
- Length = $3 \times 6 = 18$ units

Question 7: If a car travels 60 miles per hour, how long will it take to travel 180 miles?

Answer:
Using the formula:
$$\text{Time} = \frac{\text{Distance}}{\text{Speed}}$$
We have:
$$\text{Time} = \frac{180 \text{ miles}}{60 \text{ miles per hour}} = 3 \text{ hours}$$

Conclusion

The Orleans Hanna Algebra Prognosis Test is a vital instrument in identifying students' algebra readiness. By understanding the structure and types of questions on the test, educators can better prepare their students for success in algebra.
