PRODUCT INFORMATION OTICON ALTA2 PRO OTICON ALTA2

Oticon Alta2 is built on the Inium Sense platform. Alta2 provides its users with premium listening performance and can be adjusted to the individual's listening preferences. Based on the VAC+ rationale and Soft Speech Booster, Alta2 allows factoring in differences in loudness perception and optimizing the listening experience of soft sounds.

The Alta2 family styles range from compact in-the-ear options to a broad palette of behind-the-ear styles. The style range includes the new BTE13 105 Plus Power instrument, which is a compact but powerful hearing solution. It targets severe-to-profound hearing losses.

Soft Speech Booster

Soft Speech Booster is a feature of VAC+ that provides increased level of soft gain at high frequencies. The feature enhances the details of soft speech signals and is adapted to client's individual needs and preferences for soft sounds and soft speech. The Soft Sound Perception trimmer in Genie adjusts how the soft gain provided by Soft Speech Booster is delivered to each client.

YouMatic Premium

YouMatic is a personal automatic system programmed to the client's individual needs and sound preferences. YouMatic controls the sound processing across multiple environments by adjusting the instrument response times, directionality, noise management, and transient management.

Speech Guard E

Speech Guard is a signal processing system that preserves speech dynamics and speech patterns, as these are important and essential information for the auditory system. Speech Guard E is optimized to better line up with the dynamic range of speech in order to preserve more of the speech cues.

Speech Guard E maintains audibility, prevents discomfort and safeguards speech envelopes by combining the advantages of both fast and slow-acting compression.

Inium Sense feedback shield

Inium Sense feedback shield significantly reduces feedback without compromising sound quality or comfort.

Getting Started with Your Oticon Opn 1

Proper setup and initial use of the Oticon Opn 1 are vital for optimal performance. Follow these steps to get started:

Unboxing Your Device

When you first receive your Oticon Opn 1, you will find the following items in the box:

1. Oticon Opn 1 hearing aids (pair)
2. Charging case (if applicable)
3. USB charging cord
4. Ear tips (various sizes)
5. User manual and warranty information

Charging the Device

If you have opted for the rechargeable version of the Oticon Opn 1, follow these steps to charge your hearing aids:

1. Place the hearing aids in the charging case.
2. Connect the charging case to a power source using the supplied USB cord.
3. Allow the aids to charge for at least 3 hours for a full charge.
4. A full charge typically provides up to 18 hours of use.

Inserting the Hearing Aids

To properly insert your Oticon Opn 1 hearing aids:

1. Hold the hearing aid by the body, ensuring the ear tip is facing forward.
2. Gently push the ear tip into your ear canal while guiding the body of the hearing aid behind your ear.
3. Adjust for comfort, ensuring a snug fit.

Using the Oticon Opn 1

Once your device is charged and inserted, it's time to explore its functionalities.

Adjusting Volume and Settings

You can adjust the volume of your hearing aids using the following methods:

1. Using the Device Buttons: Most models feature a push button that allows you to increase or decrease the volume.
2. Using the Oticon ON App: Download the app on your smartphone to control volume and settings conveniently. The app also allows you to switch between different listening programs.

Using Bluetooth Connectivity

To connect your Oticon Opn 1 to Bluetooth devices:

1. Ensure Bluetooth is enabled on your smartphone or device.

3. Once paired, you can stream audio directly to your hearing aids from your device.

Maintenance and Care

Proper maintenance of your Oticon Opn 1 hearing aids is crucial to ensure longevity and optimal performance. Here are some essential care tips:

Cleaning Your Hearing Aids

Regular cleaning helps prevent earwax buildup and maintains sound quality. Follow these cleaning tips:

- Use a soft, dry cloth to wipe the surface of the hearing aids daily.
- Utilize a cleaning tool, if provided, to clear any debris from the microphones.
- Avoid using water, alcohol, or other cleaning agents that may damage the device.

Storing Your Hearing Aids

When not in use, store your hearing aids in a dry, cool place. If you have a rechargeable model, keep them in the charging case to ensure they remain charged.

Troubleshooting Common Issues

Despite their advanced technology, you might encounter some common issues with your Oticon Opn 1 hearing aids. Here are solutions to a few typical problems:

Hearing Aid Not Turning On

- Ensure the device is charged.
- Check to see if the battery contacts are clean and properly aligned.
- If using disposable batteries, replace them with fresh ones.

Sound Quality Issues

- Check for any blockages in the ear tip or microphones.
- Ensure that the hearing aids are properly fitted in your ears.
- Adjust the volume settings using the buttons or the Oticon ON app.

Connectivity Problems

- Ensure that Bluetooth is enabled on your device.
- Restart your hearing aids and the device you are trying to connect to.
- Re-pair the devices through the Oticon ON app.
