- **Techniques Used:**

- Natural pigments derived from minerals and plants were used to create colors.
- Techniques included blowing pigment through hollow bones and using fingers or brushes made from animal hair.

Petroglyphs and Pictographs

Petroglyphs are carvings or engravings on rock surfaces, whereas pictographs are paintings on rock surfaces. Both forms provide insights into the symbolic communication of prehistoric peoples.

- Examples:

- Petroglyphs of the American Southwest: These carvings depict various animals, human figures, and abstract designs, reflecting the spiritual beliefs of Native American cultures.
