

# **Skin Better Science Order Of Application**

# SKINCARE REGIME

## Recommended Order of Application- PM

skinbetter science® products are easily incorporated into your current routine, even when using other skincare products. A good rule of thumb when applying products is to apply from the lightest to heaviest consistency: serums and gels first, followed by lotions and then creams. An exception to this rule is that InterFuse Treatment LINES should always be applied in the order listed below to allow for optimal delivery of this product to the skin.

1.

### Oxygen Infusion Wash

- A multi-tasking cleanser with slow releasing alpha hydroxy acids and an infusion of oxygen to purify and refresh
- Infuses a burst of skin-energizing oxygen for brighter-looking skin.
- Features slow-releasing alpha hydroxy acids that instantly purify and refresh skin.
- Removes makeup, oil build-up and dead surface skin cells.

### Detoxifying Scrub Mask

- A clay-based scrub mask that uses naturally derived ingredients to resurface skin.
- Dual-functioning clay-based scrub mask that resists skin to deliver more clarity and glow.
- Uses gentle, biodegradable spherical beads to lightly resurface the skin.
- Promotes smoother, more even-toned skin.
- Clay minerals absorb unwanted oil and remove toxins and other impurities.

2.

3.

### InterFuse® Intensive Treatment LINES

- Patented, state-of-the-art delivery technology drives high molecular weight injectable-grade hyaluronic acid faster to topically fill the appearance of expression lines.
- Four additional types of hyaluronic acids of varying molecular weights work to bind water to the surface of the skin to improve moisture retention to plump the appearance of lines and wrinkles.

### Instant Effect Gel

- Refreshing daily eye gel for more resilient-looking skin.
- Improves the feel of firmness and tightness of the skin around the eyes.
- Reduces the appearance of under-eye bags.

4.

5.

### Alto Defense Serum™

- A scientifically-advanced, award-winning antioxidant product.
- Delivers 15 antioxidant ingredients.
- Neutralizes free radicals.
- Creates antioxidant shield against oxidative stress.
- Enhances skin's vitality and radiance.
- Promotes a more even tone.
- Reduces the appearance of skin redness.

### Even Tone Correcting Serum™

- Even Tone Correcting Serum, featuring the patented 3x3x3 complex by skinbetter is a ground-breaking, non-hydroquinone, non-retinol formula that delivers a visibly dramatic reduction in the appearance of hyperpigmentation.
- Breaks up the appearance of hyperpigmentation.
- Brightens the appearance of skin without the use of hydroquinone.
- Improves the appearance of yellowing that often accompanies the lack of hyperpigmentation in certain skin types.

6.

7.

### Techno Neck Perfecting Cream

- The patented NQw Complex, in a comprehensive formulation, harnesses the power of the body's natural processes to visibly improve aging skin of the neck and décolleté.

### InterFuse® Treatment Cream FACE & NECK

- Our cutting-edge approach to collagen in this peptide-rich formula.

### Hydration Boosting Cream

- Reduces moisture loss while delivering immediate and long-lasting hydration.
- A lightweight moisturizer that supports a healthy skin barrier.
- Provides soothing hydration and a velvety finish.
- Uses a unique combination of ceramides and botanical lipids to hydrate the skin and provide a smooth and supple, yet airy finish.
- Excellent in combination with treatment products, retinoids and exfoliators.
- Can be added to any skincare regimen for additional moisturization.

8.

**Skin Better Science order of application** is a crucial aspect of maximizing the benefits of your skincare routine. Understanding how to properly layer your products can enhance their effectiveness and ensure your skin receives the full advantage of their active ingredients. Skin Better Science is a professional skincare line that focuses on scientifically formulated products designed to improve skin health and appearance. In this article, we will outline the proper order of application for Skin Better Science products, explain the purpose of each product type, and provide tips to optimize your skincare routine.

## Understanding Skin Better Science Products

Skin Better Science offers a variety of products, including cleansers, exfoliators, serums, moisturizers, and sunscreens. Each of these categories serves a specific function in your skincare regimen, and using them in the correct order is essential for achieving the best results.

### Product Categories

1. **Cleansers:** These products remove dirt, oil, and makeup from your skin. Proper cleansing is essential for preparing your skin to absorb subsequent products effectively.
2. **Exfoliators:** Exfoliating products help to remove dead skin cells, promoting cell turnover and revealing fresh, healthy skin underneath.
3. **Toners:** While not all routines include toners, they can help balance the skin's pH and prepare it for better absorption of subsequent products.
4. **Serums:** Concentrated formulations packed with active ingredients designed to target specific skin concerns, such as fine lines, hyperpigmentation, or dehydration.
5. **Moisturizers:** These products hydrate and lock in moisture, providing a protective barrier for the skin.
6. **Sunscreens:** Essential for protecting the skin from UV damage, sunscreens should be the final step in your morning skincare routine.

## Order of Application for Skin Better Science Products

The order of application is integral to achieving optimal results. Here's a step-by-step guide on how to layer your Skin Better Science products.

### Morning Routine

1. **Cleanser**
  - Start with a gentle cleanser to remove any oils or impurities from your skin overnight. The Skin Better Science Gentle Cleanser is a great option, as

it cleanses without stripping the skin of its natural moisture.

#### 2. Toner (Optional)

- If you choose to use a toner, apply it after cleansing. This step can help balance the skin's pH and prepare it for better product penetration.

#### 3. Serum

- Next, apply a serum targeting your specific skin concerns. For example, the Skin Better Science AlphaRet Overnight Cream can be used in the morning for its anti-aging benefits.

#### 4. Moisturizer

- After the serum, apply a moisturizer to hydrate your skin. The Skin Better Science Hydration Boosting Cream is an excellent choice, offering deep hydration and nourishment.

#### 5. Sunscreen

- Conclude your morning routine with a broad-spectrum sunscreen. The Skin Better Science Sun Better SPF 68 is an ideal option that provides protection while being gentle on the skin.

## Evening Routine

#### 1. Cleanser

- Begin your evening routine with the same cleanser used in the morning to remove makeup, sunscreen, and impurities accumulated throughout the day.

#### 2. Exfoliator (2-3 times a week)

- Use an exfoliating product to slough off dead skin cells. The Skin Better Science AlphaRet Exfoliating Peel Pads are effective and convenient. Use these 2-3 times a week, ensuring they are not used on the same days as other strong active ingredients.

#### 3. Toner (Optional)

- Again, if you opt for a toner, apply it after cleansing or exfoliating.

#### 4. Serum

- Apply your chosen serum, focusing on areas of concern. Nighttime is an excellent opportunity to use products with potent actives, as skin naturally repairs overnight.

#### 5. Moisturizer

- Lock in hydration with your evening moisturizer. The Skin Better Science AlphaRet Night Cream provides rejuvenating benefits while you sleep.

## Tips for Optimal Results

To maximize the effectiveness of your Skin Better Science products, consider the following tips:

## Patch Test New Products

Before fully incorporating a new product into your routine, perform a patch

test. Apply a small amount of the product to a discreet area of skin to check for any adverse reactions.

## **Layering Techniques**

- Allow each product to absorb before applying the next. This helps to optimize penetration and effectiveness. A good rule of thumb is to wait about 1-2 minutes between applying products.
- Apply products from thinnest to thickest. Start with lightweight serums and finish with heavier creams.

## **Consistency is Key**

For best results, be consistent with your skincare routine. Many active ingredients require time to show visible results, so patience is essential.

## **Adjust Based on Skin Type and Concerns**

Everyone's skin is different, so it's important to tailor your routine based on your skin type and specific concerns. For example, those with oily or acne-prone skin may benefit more from lightweight, oil-free products, while those with dry skin may need richer creams.

## **Consult a Professional**

If you have specific skin concerns or conditions, consider consulting a dermatologist or skincare professional. They can provide personalized recommendations based on your skin type and goals.

## **Conclusion**

Understanding the Skin Better Science order of application is essential for anyone looking to enhance their skincare routine. By following the proper sequence—starting with cleansing, moving through exfoliation and serums, and finishing with moisturizers and sunscreen—you can ensure your skin reaps the full benefits of these scientifically formulated products. Remember to be consistent, adjust your routine as needed, and consult professionals when necessary. With dedication and proper application, you can achieve healthier, more radiant skin with Skin Better Science.

## **Frequently Asked Questions**

**What is the correct order of application for Skin Better Science products?**

The recommended order is to start with a clean face, apply serums first (like AlphaRet or Even Tone), followed by creams or moisturizers (like Trio or Hydration Boosting Cream), and finish with sunscreen during the day.

## Can I mix different Skin Better Science products in my routine?

Yes, you can mix products, but it is advisable to layer them in the order of lightest to heaviest consistency. Always allow each layer to absorb before applying the next.

## Should I apply Skin Better Science products in the morning or evening?

Most Skin Better Science products can be used both in the morning and evening, but certain active ingredients, like retinoids, are usually recommended for nighttime use.

## Is it necessary to use a toner before applying Skin Better Science products?

Using a toner is not necessary for Skin Better Science products. However, if you have a preferred toner that suits your skin type, you can apply it before your serums.

## How long should I wait between applying different Skin Better Science products?

It is generally recommended to wait about 1 to 2 minutes between applying different products to allow for absorption, especially when using active ingredients.
