## SETUP AND USAGE

The Velocity Ball automatically detects the speed of a pitched ball, and displays that information in the speed screen. By first setting up the distance between pitching location and receiver, the Velocity Ball will be calibrated for accurate readings at that distance.

### SETUP

Please follow the steps below to set up the Velocity Ball for correct operation.

1. To "wake" the speed screen, hit the ball with your hand once. If the distance shown (46' or 60') is the one you would like to use, the ball is ready for use.  
If you wish to change the distance monitored, go to step 2.
2. With a coin or flathead screwdriver, unscrew (turning counterclockwise) the plastic battery cap and remove it. Then remove the battery. Once the screen goes blank, place the battery back in its original position and screw the cap back on. This resets the distance settings and puts the Velocity Ball into Setup Mode for 2 minutes.
3. Within the two minutes of Setup Mode, hit the ball twice against your hand quickly to change the distance setting. You can repeat this as necessary within the 2-minute Setup Mode to ensure the distance is set correctly. Once the screen indicates your desired distance, allow the 2-minute Setup Mode time to run out (the speed screen should start flashing "00"). This will lock in your distance setting, and you'll be ready to use the Velocity Ball to monitor your pitches.
4. If, for some reason, you lock in the wrong setting or want to change the setting, repeat steps 2 and 3 until you've locked in the correct distance setting.  
The Velocity Ball will then be ready for use.

### Using the Velocity Ball

1. Make sure your distance from the pitching mound to the back of home plate (where your catcher will catch the ball) matches the distance displayed on the Velocity Ball's screen (46' or 60' 6"). If the screen is off, you can simply hit the ball once to "wake" it. You're ready to start pitching.
2. Pitch the ball to your catcher, and the screen will instantly display the pitch speed after the Velocity Ball is caught. For the most accurate results, the catcher should catch it squarely in the middle of his or her glove. (Do not use with a pitchback. Readings will be inaccurate.)
3. The number on the screen will start flashing after a few seconds; this is the standby mode that indicates the ball is "reset" and is ready for the next pitch.
4. The Velocity Ball also has an "Auto Power Off" function that automatically puts it into sleep mode if the ball is not in use for 3 minutes. To exit sleep mode, hit the ball once.
5. If the battery life gets low, the screen display will start to blur. Please replace the battery (LR-41 mercury battery) when this happens.

**WARNING:** This product includes a delicate electronic device.

To prolong the product's lifespan and avoid malfunction:

1. Do not use this product for batting.
2. Do not throw it against a hard wall or the ground. Always throw it toward a catcher wearing proper mitt and safety equipment.
3. Do not use this product on a traffic road, or crowded area.
4. Do not use this product in the rain or on wet ground. The product is not 100% waterproof, and might not function correctly if water leaks into internal components.
5. Do not use this product for any purpose other than determining ball pitching speed.

### **4. Fun and Engaging Training**

- The dynamic nature of the Bullet Ball makes training entertaining, which can motivate athletes to practice more consistently.

## **Setting Up the SKLZ Bullet Ball**

Setting up the SKLZ Bullet Ball is a straightforward process, allowing athletes to quickly begin their training sessions. Follow these steps for an effective setup:

### **1. Choose Your Space**

- Select a flat, open area with enough room to move around.
- Ensure the surface is safe and free of obstacles that may cause injuries.

### **2. Install the Base**

- Place the Bullet Ball base on the ground.
- Make sure it is stable and secure to prevent tipping during use.

### **3. Attach the Ball**

- Connect the ball to the adjustable cord on the base.
- Ensure that the ball is securely fastened and can move freely.

### **4. Adjust the Height**

- Modify the height of the Bullet Ball to suit your training needs.
- Test the height to ensure it is comfortable for your specific drills.

## **Using the SKLZ Bullet Ball**

Once you have set up the SKLZ Bullet Ball, you can begin using it in your training routine. Here are some recommended exercises to get you started:

## **1. Basic Reaction Drills**

- Stand in front of the Bullet Ball and focus on the ball.
- When the ball is released, react by catching it with one hand, alternating hands with each throw.

## **2. Catch and Throw Drills**

- Catch the ball with one hand and immediately throw it back to the base.
- Try to increase the speed and accuracy of your throws over time.

## **3. Dodging Drills**

- Position yourself a few feet away from the Bullet Ball.
- As the ball bounces back, practice dodging and moving side to side while keeping your eyes on the ball.

## **4. Partner Drills**

- Team up with a partner and take turns using the Bullet Ball.
- One person can control the speed and angle of the ball, while the other practices catching and reacting.

## **Tips for Maximizing Your Training**

To get the most out of your training sessions with the SKLZ Bullet Ball, consider the following tips:

### **1. Consistency is Key**

- Incorporate the Bullet Ball into your regular training routine.
- Aim for at least three sessions per week to see significant improvements.

### **2. Focus on Technique**

- Pay attention to your form while catching and throwing the ball.
- Good technique will enhance your training efficiency and reduce the risk of injury.

### **3. Track Your Progress**

- Keep a journal of your training sessions, noting improvements in reaction time and coordination.
- Set specific goals to stay motivated and measure your success.

## **4. Mix It Up**

- Vary your drills to keep training exciting and challenging.
- Incorporate different sports-related movements to enhance overall athletic performance.

## **Safety Precautions**

While training with the SKLZ Bullet Ball offers numerous benefits, it's essential to prioritize safety. Here are some precautions to consider:

### **1. Warm-Up Properly**

- Always begin with a proper warm-up to prepare your body for the physical demands of training.
- Include dynamic stretches and light cardio to reduce the risk of injury.

### **2. Use Appropriate Footwear**

- Wear suitable athletic shoes that provide good support and grip.
- Avoid training on slippery surfaces to prevent falls.

### **3. Stay Hydrated**

- Keep water nearby and take breaks when needed.
- Staying hydrated is crucial for maintaining optimal performance.

### **4. Recognize Your Limits**

- Listen to your body and avoid overexerting yourself.
- If you feel pain or discomfort, stop and rest before continuing.
