Inputs and outputs

Connectors are described from right to left. For setup examples, see "Connection diagrams".

MIC connector
This is where the magic happens!

Plug your dynamic, condenser, MP-75, or e835 fx microphone in here. Remember to set the microphone type and level correctly, as described in the Play Acoustic Quick Start Guide.

GUITAR IN connector
Connect your guitar to this input.

AUX connector
Use a 1/8" cable to connect any music source you want to use to your Play Acoustic (especially that 8-Track from your 1974 Comet). When an input is detected here and no guitar is plugged in, Play Acoustic will use the music signal to figure out key and scale information.

GUITAR DI (R) and VOICE (L) output connectors
These are the main output connectors of your Play Acoustic. By default, mono vocals are sent via the Voice (L) connector, and a mono guitar signal is sent via the Guitar DI (R) jack. This configuration can be changed in the Setup/Output menu.

GND switch
This is a ground lift switch. If you experience hum while using Play Acoustic, try pressing the GND switch to reduce or remove the hum.

Headphones connector
Connect your headphones to the Phones connector.
