1. Start with a Strong Opening Guess

Your first guess is crucial. Choose a word that contains a mix of common vowels and consonants. Words like "crate," "slate," or "stone" can provide valuable information about the target word.

2. Analyze Feedback Carefully

After each guess, pay close attention to the feedback provided. Use this information to narrow down your next guess. For example, if you receive a yellow letter, try placing it in a different position in your next guess.

3. Use Process of Elimination

As you progress through your guesses, eliminate letters that you know are not in the word. This technique can significantly narrow down your options and lead you to the solution more efficiently.

4. Think Outside the Box

Sometimes, the answer can be a less common word. Don't hesitate to think creatively and consider less obvious possibilities. Familiarizing yourself with a wide range of vocabulary can be beneficial.
