Tips for Preparing and Storing Kale

To make the most of your kale, consider the following tips for preparation and storage:

Preparing Kale

1. **Choosing Kale:** Look for fresh, vibrant leaves that are free from yellowing or browning. Curly kale and Lacinato (dinosaur) kale are popular varieties.
2. **Washing:** Rinse kale leaves thoroughly under cold water to remove any dirt or debris. Pat dry with a towel or use a salad spinner.
3. **Removing Stems:** The stems can be tough and fibrous. Hold the stem with one hand and strip the leaves off with the other.
4. **Massage:** If using kale in salads, massaging the leaves with a bit of salt or olive oil can help tenderize them and reduce bitterness.

Storing Kale

1. **Refrigeration:** Store unwashed kale in a perforated plastic bag in the refrigerator crisper drawer. It can last up to a week.
2. **Freezing:** For longer storage, blanch kale in boiling water for 2 minutes, then transfer to an ice bath. Drain and freeze in airtight containers or freezer bags.
