1. Preliminary Exam

- Format: The preliminary exam typically consists of 50 multiple-choice questions covering a wide range of biological topics.
- Duration: Participants are given 60 minutes to complete the exam.
- Scoring: Top scorers from this exam qualify for the semifinal round.

2. Semifinal Exam

- Format: This exam includes 80 multiple-choice questions, some of which may require problem-solving skills.
- Duration: Participants have 90 minutes to complete it.
- Scoring: The highest scorers advance to the national finals.

3. National Finals

- Format: The finals include a written exam, practical lab work, and team activities.
- Location: This event is typically held at a designated university.
- Recognition: Winners receive medals, certificates, and the opportunity to represent the USA at the International Biology Olympiad (IBO).

Key Topics Covered in USABO

To prepare effectively for the USABO, students should have a strong grasp of various biological concepts. The following are the primary topics that participants should focus on:

1. Cell Biology

- Structure and function of cells
- Cellular processes, such as respiration and photosynthesis
- Cell division (mitosis and meiosis)

2. Molecular Biology

- DNA structure and replication
- RNA transcription and translation
- Genetic code and gene regulation

3. Genetics

- Mendelian genetics and inheritance patterns
- Population genetics and evolution
