It encompasses various subfields, including microeconomics, macroeconomics, and econometrics, each focusing on different aspects of economic theory and practice.

When filling out the Common Application, students can specify their intended major. Economics may be listed under various headings depending on the institution, including:

### **Writing the Common Application Essay**

One of the most critical components of the Common App is the personal essay. For students interested in economics, this is an opportunity to showcase their passion for the subject. Here are some tips for crafting a compelling essay:
