Wonderlic test

The eleventh month of the year is:

- A. January
- B. November
- C. October
- D. May - The correct answer is (B). The eleventh month of the year is November.

A shop owner bought some shovels for \$5,500. The shovels were sold for \$7,300, with a profit of \$50 per a shovel. How many shovels were involved?

- A. 18
- B. 36
- C. 55
- D. 73
- E. 90
- F. None of these - The correct answer is (B). The total profit from the sale is the selling price minus the cost of purchase, which is $\$7300 - \$5500 = \$1800$. If the total profit is \$1800 and each shovel accounts for \$50 profit, the amount of shovels is $1800/50=36$.

How many states are there in the U.S.A?

- A. 20
- B. 30
- C. 40
- D. 50
- E. 60 - The correct answer is (D). The USA has 50 states.

There are three times elephants compared to giraffes in the safari. If there is a total of 88 elephants and giraffes, how many elephants are there in the safari?

- A. 22
- B. 31
- C. 43
- D. 59
- E. 66
- F. None of these - The correct answer is (E). If there are 3 times as many elephants as there are giraffes, giraffes can be defined as X, and elephants as 3X, and build the following equation:
 $3X + X = 88$
 $4X = 88$
 $X = 88/4$
 $X = 22$

As stated above, X stands for the number of giraffes. Thus, there are 22 giraffes. As mentioned in the problem, there are three times as many elephants as there are giraffes in the safari. Thus, to find how many elephants there are in the safari, multiply the number of giraffes by 3.

2. Screen Candidates: It acts as a preliminary screening tool to narrow down the pool of applicants.
3. Identify Training Needs: Results can indicate areas where further training or development may be necessary.

Format of the Test
