STATES OF MIND: WISE MIND

In DBT there are 3 states of mind: emotion mind, reasonable mind, and wise mind. Emotion mind is used when feelings control a person's thoughts and behaviours without considering the facts of a situation. Reasonable mind is used when thoughts and behaviours are controlled by intellect and logic without considering one's values. The balance between these two minds is wise mind. In wise mind, we can recognize and respect our feelings while responding to them in a rational manner.

Understanding the Wise Mind Worksheet

The wise mind worksheet is a powerful tool rooted in Dialectical Behavior Therapy (DBT), designed to help individuals navigate their emotions and thoughts more effectively. Developed by psychologist Marsha Linehan, DBT incorporates mindfulness and cognitive-behavioral techniques to assist those struggling with emotional regulation. The concept of "wise mind" integrates both rational thought and emotional insight, allowing individuals to make balanced decisions that consider both their feelings and logic.

This article will explore the wise mind worksheet, its components, how to use it effectively, and its benefits for emotional well-being.

What is the Wise Mind?

To fully understand the wise mind worksheet, it's essential to grasp the concept of the wise mind itself. In DBT, the mind is often viewed as having three states:

- **Emotional Mind:** This state is dominated by feelings and emotions. Decisions made in this state can be impulsive and may lack rational thought.
- **Rational Mind:** This state is focused on logic and facts. While it is analytical, it may overlook emotional needs and personal experiences.
- **Wise Mind:** This is the optimal state where both emotional and rational minds work together. It allows for a balanced perspective that considers feelings alongside logic.

The wise mind is where individuals can find clarity, make thoughtful decisions, and respond to life's challenges in a more balanced way.

Components of the Wise Mind Worksheet

The wise mind worksheet typically includes several sections that guide users through the process of finding their wise mind. Here are the primary components:

1. Identifying the Situation

In this section, you detail the specific situation or emotional challenge you are facing. It is crucial to be as clear and specific as possible. Writing down the situation helps to externalize thoughts and feelings, making them easier to analyze.

2. Emotional Mind Responses

Next, you list the feelings and emotional reactions you are experiencing regarding the situation. This section allows you to acknowledge your emotions without judgment. Common feelings might include:

- Anger

- Sadness
- Anxiety
- Frustration
- Fear

Recognizing these emotions is the first step toward integrating them into the wise mind process.

3. Rational Mind Responses

In this part of the worksheet, you identify logical thoughts and facts related to the situation. What do the facts say? What evidence do you have? This includes analyzing the situation through a more detached, logical lens. Consider questions such as:

- What are the objective facts of the situation?
- What are potential solutions based on logic?
- What would I advise a friend to do in this situation?

This step helps to ground your emotional responses in reality and encourages a more rational approach.

4. Finding the Wise Mind

This section is where the integration occurs. You take the insights from both the emotional and rational mind sections and look for a balanced approach. This might involve:

1. Combining emotional insights with logical reasoning.
2. Considering what the wise mind would suggest as a course of action.
3. Identifying potential outcomes based on both perspectives.

The goal is to derive a response that acknowledges your feelings while also

considering rational solutions.

5. Action Plan

Finally, you'll outline an action plan based on your wise mind conclusion. This includes:

- Specific steps to take in response to the situation.
- Methods to cope with emotions as they arise.
- Strategies for seeking support from others if needed.

Having a clear action plan empowers you to move forward confidently, armed with a balanced perspective.
